

STRIKE ENDS, TRAINS RUNNING AGAIN

FORD SEEKING
TOP POSITION
IN AUTO FIELDCOMPANY REVAMPED
AS COMPETITORS
SPECULATE

BY DAVID J. WILKIE
Associated Press Automotive
Editor

Detroit, May 25 (P)—Henry Ford II, president of the Ford Motor Co., is giving his competitors—and others—much to speculate about as he revamps the big company in his efforts to recapture top position in the low-priced car field, held for more than a decade by Chevrolet.

In two years of executive responsibility young Ford has made many changes in the great Ford empire, reiterating meanwhile that the company's major function is to make and sell automobiles.

One of his first moves was to reorganize the company's administrative personnel. The changes were far-reaching. It has been said they reduced the executive payroll by at least \$1,000,000 a year.

Experiments Eliminated
He is eliminating a lot of the company's non-productive activities. The great rubber plantation project the elder Henry Ford started in South America in 1927 was turned back to the Brazilian government last fall. It had cost Ford many millions of dollars.

Various other company operations—many of an unrelated nature—are being subjected to increasingly close scrutiny. Young Ford wants to know what they contribute to the company's profit and loss.

Last week he announced that Ernest R. Breech, president of Bendix Aviation Corp., a General Motors affiliate, would come to the Ford Motor Co. July 1, as a director and executive vice-president. The Breech salary was not disclosed, but last published figures on his compensation as president of Bendix Aviation credited him with \$133,999 a year.

Lighter Car Coming
Young Ford, it has been said, is streamlining the company for the toughest competitive battle in its history of nearly 43 years.

Behind the scenes to fan the interest of the Ford competitors company engineers are perfecting a new lightweight Ford and at the same time carrying on never-ending experiments with varying types of cars and power plants. These range from the pancake gasoline type to the hydraulic variety that applies power separately to each of four wheels.

Major objective of all this experimental work, of course, is to find the types of cars that will meet the public demand—and the public pocketbook. Ford has said his company "will make any kind of a car the public will buy."

In his effort to get back into first place in car output Ford got his first post war automobile off the assembly line last July 3, less than three days after the War Production Board gave industry the go ahead signal.

Plagued By Shortages
But parts and materials shortages have plagued Ford ever since. In the nearly 11 months since the first post war Ford was assembled the company has been forced to close down half a dozen times. From Jan. 1 to date it has produced only 187,000 units. With unrestricted supplies Ford could turn out that number in less than six weeks.

Orders on hand from dealers call for more than a million passenger cars alone.

The company today disclosed some of the lengths to which it went in the effort to keep assembly lines operating. To get needed burlap for spring covers and coil

Local Rail Service
Resumed After Strike

Beginning at 8:55 p. m. last night with the south-bound departure of North Western train No. 162 manned by her regular crew, and the departure at 8 p. m. of a train from Escanaba to Iron River, regular passenger train schedules were resumed here.

Striking railroad men of the operating brotherhoods began going back to their jobs yesterday evening following announcement of the strike settlement in Washington.

The ore boat C. C. Conway of the M. A. Hanna line docked at Escanaba at 1:30 p. m. yesterday, and it was expected she would be loaded and possibly clear today. Three hundred cars of ore have been tied up in the yards for several days due to the rail strike. The A. E. Heekin is due here this morning and the E. W. Mudge Monday morning.

The North Western streamliner arrived in Escanaba about 5 a. m. yesterday, last day of the strike. She was about six hours late because of the delays in handling mail and express enroute from Chicago. Yesterday morning the 400 returned to Chicago, manned by supervisory personnel.

Coal Miners Urged
To Remain On Job;
No Agreement Yet

Washington, May 26 (Sunday) (P)—A two-week truce in the soft coal strike ebbed out today after lengthy Saturday conferences between Secretary of the Interior J. A. Krug and John L. Lewis failed to produce a contract settlement.

Many, although not all, of the nation's mines have operated for two weeks under a truce which expired at 12:01 this morning.

Whether the miners will return to the pits Monday was a matter of speculation.

Krug, however, appealed direct to the coal diggers to come back to the federally seized pits Monday.

The way was left open for a last-hour settlement with announcement that there will be more talks tomorrow at an hour yet to be fixed.

Thus there remained one more major immediate threat to the nation's economy. In time, a coal strike could again shut down the railroads and throttle power utilities and industry.

The two-week truce called by Lewis May 10 made it possible for railroads and other essential industries to build up to a limited extent the stockpiles which had been critically depleted from the 42-day strike.

The government had hoped to get 20 to 25 million tons for essential use during the truce. Instead the Solid Fuels Administration, which took over control of the

output, will be lucky to have gotten 15 million tons.

In the absence of a settlement between Lewis and the government tomorrow, the coal strike may provide a quick test for President Truman's new legislation, if enacted.

Another major crisis is coming up June 15, when the CIO Maritime Union which recently formed a committee for joint action, are scheduled to walk out.

The White House has its eye on that one, too, for its political as well as economic effect on world affairs.

Krug's announcement of "no agreement" and his plea to the miners, made at the end of a conference of nearly three hours with the United Mine Workers head. They went into session about an hour after President Truman had asked Congress for "drastic" legislation to curb strikes started or continued after government seizure.

Lewis himself had nothing at all to say.

Lewis was advised at a session this morning of the government's position on his contract demands, and the late day meeting was called to get his reply.

A spokesman for Krug, besides reporting the failure to agree, said there was "no extension of the truce."

Asked to explain this, he said, "Mr. Krug says that Mr. Lewis' position is the same as it has been all along—that he cannot take any action which interferes with the miners in view of the Smith-Connally War Labor Disputes Act."

MICHIGAN RAIL
TRAFFIC NEAR
NORMAL AGAINDANGER OF FOOD
PANIC ABATED;
BUYING HEAVY

(By The Associated Press)

Michigan's railroad system quickly headed back to normal Saturday night as the railroad strike's end was announced.

M. M. Cronk, Pere Marquette general manager, said his line would be operating normally four hours after the settlement, but C. L. Jellinghaus, vice president and general manager of the New York Central here, said regular operations could not resume until Sunday afternoon.

The Pere Marquette's 4:55 to Grand Rapids was the first train to leave Detroit with its regular crew aboard. Leaving the Union depot, it was followed shortly by a Pennsylvania railroad train for New York, and a Chesapeake and Ohio train for the south, all manned by regular crews.

Other railroads attempted only partial service Saturday night, however.

Early reaction to President Truman's request for railroads to return was negative in Michigan. Spokesmen for Detroit members of the striking brotherhoods said they would not go back to work until so ordered by their headquarters.

Few if any Michigan railroaders returned to their jobs during the day, according to spokesmen for the operators.

Commenting on the president's radio address, R. F. Hardy, head of the Detroit Trainmen's Brotherhood, said he was "thoroughly disgusted" with the attitude of the president.

William F. Dolan, deputy vice president of the trainmen, said: "The president's statements were inaccurate. He has described only one side of the picture."

"So far as I know," Dolan said, "none of the strikers are going back."

Railroad operators also spent the day watching and waiting. They were able to maintain only severely curtailed and unpredictable service with makeshift crews.

New York Central was unable to send out the Mercury, scheduled to leave for Chicago at 12:30 p. m. today, though it ran Friday. The Twilight Limited, regularly making the Chicago run at 4:45 p. m., was also cancelled.

No New Shutdowns

Lansing officials of the Grand Trunk reported two of their trains made the east-west run.

In Chicago, Lt. Gen. Walton H. Walker, commanding officer of the Sixth Service Command, said Saturday there had been "a limited movement of troops to improve their location" in the command.

The Chicago headquarters was altered "for eventualities." The command covers, Michigan, Illinois and Wisconsin.

Meanwhile food panic manifestations abated according to Saturday's report of state police to Gov. Harry F. Kelly in Lansing.

The governor said buying was up 25 percent generally over the state, less than Friday and that "in general the situation shows a fairly satisfactory reaction."

Conditions are sufficiently normal, Kelly said, to permit him to fly to Oklahoma City Sunday for the Governors' Conference.

There were no new reports of industrial shutdowns Saturday.

Friday, however, Nash-Kelvinator announced the layoff of 15,000 workers, because of crippling effects of the rail strike. General Motors, Chrysler, Hudson and Packard factories were still in operation, but officials were pessimistic about prospects for continuing if the rail strike was not called off.

Postal Service
Back To Normal

Washington, May 25 (P)—The postmaster general ordered normal mail service resumed in the country at 5 p. m. EST, ending a partial embargo ordered during the rail strike.

The department announced: "Postmasters should resume normal acceptance of mail matter of all classes. Temporary arrangements for postal transportation should be continued until normal transportation has been restored and until the temporary services are effectively superseded by normal service."

PHANTOM KILLER? — Ralph B. Baumann, 21, former Army Air Force gunner, who told Los Angeles police he "thinks" he may be the "phantom killer" of five Texarkana, Texas, residents. He was booked on suspicion of murder after Los Angeles police arrested him at a shooting gallery. (NEA Telephoto.)

PRICE CONTROLS
TO BE REMOVEDDairy Products And Meat
To Come Off OPA
List June 30

Washington, May 25 (P)—The Senate Banking Committee voted today to lift price controls from meat and dairy products June 30, 1946.

The action came only a few hours before President Truman personally urged a joint session of Congress to continue the price control law "in an effective form."

The committee, which is drafting a one-year price control extension bill, adopted two amendments, both introduced by Senator McFarland (D-Ariz.). The one covering livestock and poultry, and food and feed products manufactured from those items, carried over the 9 to 8 vote.

The committee wrote in a safeguard against the possibility of runaway prices. A de-control board, which is to be set up under the Senate bill, would be given additional authority to reinstate price controls on meat and dairy products upon application of the secretary of agriculture.

McFarland said he assumed the current meat subsidies will be removed when the controls are lifted.

If the usual trend is followed, he told a reporter, the price of meat is likely to rise for awhile and then level off.

"If it doesn't level off, it would be the duty of the secretary of agriculture and the board to put the controls back on," he said.

Minority Walks Out
Of Opening Session
In Filipino Senate

Manila, May 25 (P)—Minority members of the Philippines senate walked out on the opening session today, delaying formal proclamation of Manuel R. Roxas as president of the republic.

A joint session of the house and senate is required to certify the results of the April election, but it could not be held because the senate became involved in a dispute over the number of votes needed to organize the upper chamber.

New Record Is Set
For Painting House

Schenectady, N. Y., May 25 (P)—Thirty-five men painted a new, five-room cottage in three minutes 13.2 seconds today and claimed a world's speed record.

An estimated 2,000 spectators cheered the men, all from Painters Local 62 (AFL), as they coated the house white. The dwelling will be occupied soon by Joseph Valentine, a war veteran, and his family.

A week ago 38 men painted a Marion, Ill., home in five minutes 24.2 seconds.

TROOP ORDER CANCELLED

Washington, May 25 (P)—An order for the movement of 3,000 troops by air from Camp Campbell, Ky., to Chicago was cancelled today, the war department reported, immediately after the announcement of the rail strike settlement.

Railroad Men
Accept Raise
Of 18½ Cents

By Douglas B. Cornell

Washington, May 25. (P)—The railroad strike ended suddenly today only minutes before President Truman asked, and got, action on legislation to permit drafting of men for industrial emergencies and penalizing strikes against government-seized properties.

The measure, Mr. Truman told the lawmakers, is "necessary for the preservation of our government."

The house responded with an exceptional burst of speed, passing and sending to the senate exactly what the president asked.

Congress Whoops
So far as the rail walkout was concerned the legislation no longer was needed. Representatives of the carriers and two striking unions—Engineers and Trainmen—signed at a downtown hotel an agreement halting the strike. Then they went on a hand-shaking spree.

Mr. Truman announced to a wildly whooping congress that the strike was over. Grim, unsmiling, he interrupted an address to a joint senate-house session at the point where he said:

"I request the congress immediately to authorize the president to draft into the armed forces of the United States all workers who are on strike against their government."

No Change In Rules
While legislators howled their approval for that, Senate Secretary Leslie Biffle leaned over and whispered to the chief executive.

"Word has just been received," he said, "that the rail strike has been settled on terms proposed by the government."

That produced another tremendous outburst.

The basis of agreement was a compromise plan Mr. Truman himself had offered. It provides for a pay raise of 16 cents an hour retroactive to January 1, an additional boost of 2½ cents effective May 22—two days ago, when the strike began—and no change in working rules for a year.

The settlement was completed three minutes before the 4 p. m. EST, deadline the president had set for strikers to give in. Otherwise, he said, he would use troops to run and protect trains.

Soldiers were standing by at railroad centers to do just that. Government and railroad officials predicted rail service would be nearly back to normal tomorrow. How long the government would continue to operate the lines it took over last Wednesday remained uncertain.

Trainmen "Lost Case"
A. F. Whitney, president of the Trainmen, glumly declared "we lost our case." In San Francisco, P. O. Peterson, general chairman of the Engineers on the Southern Pacific Railroad, told a reporter:

(Continued On Page Eight)

DR. PETIOT DIES
FOR KILLING 27Bluebeard Of Paris Goes
To Guillotine With
Smile On His Lips

PARIS, May 25 (P)—A headman wrote the final chapter today in one of the weirdest murder stories in Paris criminal history, as slight, 55-year-old Dr. Marcel Petiot, a faint smile on his lips, paid with his life for the cold-blooded murder for profit of 27 desperate people.

Public executions have been banned in France since 1939, and only a few witnesses, among them his lawyer, Rene Floriot, saw the mass murderer of the Rue La Source go to his death on the guillotine. President Felix Gouin two days ago rejected a plea for a reprieve.

At the foot of the guillotine block Petiot received the last religious rites from a priest "to please my wife." Then, manacled to his guards, he mounted the block, smiling faintly as he approached the knife.

At 5 a. m. a lorry backed into the main gate of La Source prison. Ten minutes later it came out, carrying a casket with Petiot's body, and lumbered away to tiny Ivery cemetery.

Shortly afterward an official notice was posted on the prison gate, announcing that at 5:05 a. m. the law had exacted the full price from the man convicted of collecting money from his victims on pretense of helping them to escape Nazi occupied France.

HOUSE PASSES
NEW WALKOUT
CONTROL BILLPRESIDENT GRANTED
POWER TO DRAFT
MEN IN INDUSTRY

Washington, May 25 (P)—Draconian legislation that President Truman demanded to draft workers in emergency and penalize strikers against the government sailed through the house today but hung up until Monday on a senate snag.

The senate passed instead to night a stringent labor dispute measure of its own, 49 to 29. It was a measure akin to the Case strike-control bill already approved by the house. Now it is up to the house to act on senate changes.

Just before the senate adjourned Democratic Leader Barkley got unanimous agreement to make Mr. Truman's new measure the first item of business on the slate for Monday.

PEPPER CRITICAL
Washington, May 25 (P)—Senator Pepper (D-Fla.), criticizing President Truman's strike-control legislation today as giving the executive "unrestrained power over life, liberty and property" predicted the president will "regret this day."

Pepper also asserted Mr. Truman will regret his proposal to draft workers for government-seized plants involved in shutdowns.

"I charge that the employers and the government of the United States are as much responsible for the mine strike and the rail strike as the operating personnel," he said in a radio address.

It was a thumping 306 to 13 vote that whipped that bill through the house late today. Mr. Truman had made a personal appeal for the legislation at a joint senate-house session.

Rules Suspended
The legislation was adopted by the house under virtually unprecedented procedure whereby regular rules were suspended for the day.

The president had asserted that action was imperative to prevent thousands of workers from being harmed by the actions of their leaders.

The measure, at Mr. Truman's own suggestion, is effective only for six months after the "cessation of hostilities" as proclaimed by the president.

The bill does this:
1. Specifies that the chief executive may proclaim a national emergency at any time that an interruption occurs in operation of any facility he deems "vital to the maintenance of the national economy."

2. Gives the president power to draft into the armed forces any individuals necessary to run such strike-bound plants during the existence of such an emergency.
3. Takes away the seniority

LEGION PLANS FOR CLUBHOUSE

Peterson Building Purchased; Option On Adjacent Property

Cloverland Post of the American Legion has purchased the Peterson building, adjacent to Lauerman's, and will convert the property into a clubhouse for the organization. It has been announced by John Peltier.

Negotiations are also under way to purchase the adjoining building from the Erickson estate. This building is now being used by the Legion post as its headquarters. An option has already been secured on the property, Peltier revealed.

The social welfare offices now located on the ground level floor of the Erickson building will be moved upstairs for the time being, Peltier indicated, although it is planned to eventually utilize both the upstairs and downstairs quarters for the use of the Legion. The facilities of the adjoining building will also be utilized for the Legion activities.

Clubrooms will be established on one side and a hall room on the other, Peltier said. New furnishings and equipment will also be provided as soon as they are available.

Newspaper Reader Only Six Puzzles School Officials

Frederick, Md.—Pupils aren't the only ones here who'll run into problems when the next school term starts in September. School officials will run into a problem of their own—what to do with Grant Willis, who's six on June 22.

It's a problem because Grant already reads the daily newspapers, and the authorities figure, putting him through the lower grades would mean sending him over ground he's already covered at home.

Grant was entered in the third grade when his maternal grandmother brought him here last October from Falmouth, Mass. But after one day his teacher asked, "What can I do with a child in this class who already understands the newspapers?" The problem was solved that time when Grant's birth certificate showed him to be under school age.

The boy's grandmother, a gift shop owner, says Grant "loves to read the dictionary," and encyclopedia, is a mature checker player and solves intricate jig saw puzzles.

He's been reading since he was two and a half. He learned his alphabet before he was two. He can give the substance of what he reads from the newspapers. He's quick to find grammatical errors.

Grant's folks feared he might strain his eyes reading; so they started putting him to bed early and turning out the lights in his room. Later they found out he was reading by the faint rays coming under his bedroom door from a hall light.

Price Controls Put Back On Potatoes

Washington, May 24 (AP)—OPA today slapped price controls back on potatoes for the rail strike emergency. The action is effective immediately.

"Since potatoes rank with wheat, flour and bread in importance as a staple food commodity," OPA said, "it is important not to allow prices to shoot up if scarcities begin to develop in areas awaiting shipments tied up by the present emergency."

The agency said ceilings being restored are those which were in effect at this time last year when potatoes were under price control. In another emergency action,

Follow Instructions In Using DDT Insecticide

HENRY L. PREE
Written NEA Service
Publicity given to DDT as an insecticide has created wide interest in its possible uses, and now that it is available to the gardener, many inquiries regarding it are being received by the U. S. Department of Agriculture. To help answer inquiries and to avoid confusion as to the results to be expected from its use the Bureau of Entomology and Plant Quarantine says that the knowledge of the practical uses of DDT insecticides in agriculture and in the home is still far from complete.

DDT is suitable for use as an insecticide only when properly prepared, and only a small quantity is needed, usually from one to 10 per cent is sufficient depending upon the intended use. And in every instance the gardener should follow the maker's instructions.

With the garden season well under way and insect pests beginning to appear, potential DDT users should begin to think now of effective pest control for the summer months. Unsurpassed in some insecticide fields, DDT is useless or dangerous in others.

For instance it is harmful to squash, pumpkin and other cucurbits. And it will also retard the growth of tomatoes, beans and strawberries. Almost as important as using the proper concentration of DDT is controlling the rate and time of application. In many cases, DDT will be completely ineffective if the exposure is too short or the treatment not repeated in time.

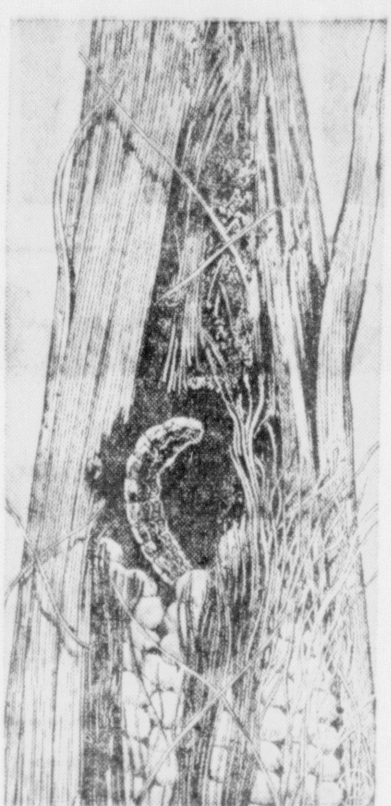

APPLIED AS SPRAY OR DUST
DDT can be applied on plants either as a spray or dust. The spray should carry the DDT in suspension and NOT in solution. Oil solutions, or emulsions of DDT may injure plants and animals, and they are largely limited to use in buildings for roaches, fleas, etc.

DDT when mixed with an inert material makes a safe dust for use on either plants, or animals. The strengths vary from 3 to 5 per cent DDT. Three per cent is satisfactory for most pests of plants. Light applications at about 10-day intervals are recommended for leafhoppers on potatoes, beans and other plants.

DDT alone will control: all species of cabbage worms (with applications to be made before head is formed); asparagus beetles; leaf-hoppers (be sure to apply to underside of leaves); European corn borer (on early corn only); corn earworm (on late corn only); gladiolus thrips; rose slugs; leaf tyders and rollers; blister beetles.

Combined with Rotenone, DDT will control both Mexican bean beetle and bean leafhoppers if undersides of leaves are sprayed or dusted.

DDT will not control: pear psylla; apple maggot; plum curculio; Mexican bean beetle; most aphids; red spider; European red mite; chiggers; poultry mites; tobacco hornworms; white grubs; wireworms; cabbage maggot; bean

DDT protects corn by killing the corn earworm, sketched above, and the European corn borer.

seed maggot; tree borers and cat-tie grub.

DDT may kill pollinating insects and should never be applied to trees or flowers which are in bloom.

Lead arsenic is still the standard insecticide for apples and stone fruit.

DDT is one of the most beneficial products to be developed during the war, and used with caution, it can be of great value in almost every field of pest control. Applied indiscriminately, it can be both useless and dangerous to plants, animals and humans.

Warns Against Use Of Green Lumber

Madison (AP)—Pointing out that demands made it necessary for lumber producers and distributors to dispose of building materials in an almost tree-to-building jump, L. V. Teedale, engineer at the U. S. Forest Products Laboratory, offered builders suggestions today to overcome unseasoned lumber troubles.

Teedale advocated buying framing lumber and stacking it two or three months before building starts; delaying construction after the framework is up and confining homes to one-story structures if possible to eliminate later shrinkage losses.

He urged that every effort be made to buy lumber from companies with adequate drying facilities.

Charles II of England sold Dunkerque to the French for 5,000,000 livres.

NEGROES SEEK RACE EQUALITY

Robeson Speaks During Meeting Of National Negro Congress

Detroit, May 25 (AP)—An international campaign to deal a "death blow to Jim Crow" will be launched here next week at the 10th anniversary convention of the National Negro Congress.

Meeting in Detroit for the first time May 30-June 2, the NNC's 1,000 delegates are expected to put forth a militant cry for action to wipe out racial discrimination wherever it exists.

"United States, British and Dutch imperialism have clasped hands in a united program of oppression," a congress spokesman declared. "The fight against Jim Crow at home is a strike at colonial oppression everywhere."

An 11-point program for "freedom and equality" will be submitted to the delegates. It embraces:

Equal jobs and economic security for Negroes and enactment of a permanent fair employment practices committee.

Development of "working unity" between Negroes and organized labor; support of union organizational drives in the South.

Passage of the anti-poll tax and anti-lynch bills.

Passage of the Wagner-Murray-Dingell health bills. The 65-cent minimum wage bill and other measures on labor's legislative program.

An end to "police and armed violence" against Negroes and organized labor.

No discrimination against Negroes in armed forces or in administration of the GI Bill of Rights.

Adequate housing, health protection and education without segregation or discrimination.

Protection of rights of Negro farm laborers, including their right to organize.

Freedom for colonial peoples and American support to principles of UNC; friendship with Soviet Union as a "necessary means to peace."

Highlight of the four-day meeting will be a "Freedom Rally" Friday night, from which Paul Robeson, famed Negro singer and actor, will make a network radio broadcast. Other speakers will include Rep. Hugh Delacy of Washington, bandleader Artie Shaw and his actress wife, Ava Gardner, and secretary-treasurer George F. Addes of the CIO United Automobile Workers.

Migrating butterflies that winter in Pacific Grove, in California, are protected by city ordinance.

Pupils of blue eyes contract more in bright light than pupils of brown eyes.

Retirement At 70? Hardly, Says Hard-Headed U. S. Jurist

BY FELIX B. WOLD
Detroit, May 25 (AP)—Retirement talk to 70-year-old Federal Justice Charles C. Simmons gets a shy pleasant grin from him, and that's about all.

To Judge Simmons' evident amusement, the retirement idea arose this week when he reached 70. A federal statute would permit him to call it quits at that age. Bue he laughed it off.

"There's nothing unusual to working past 70," he said, pointing to the examples of U. S. Supreme Court Justices Oliver Wendell Holmes and Louis Brandeis. Holmes worked past 90, Brandeis to 83.

Justice Simmons is Detroit's little man in a big judge's chair. He has served the U. S. Sixth Circuit Court of Appeals which assembles in Cincinnati, for 13½ years. He was a federal district judge for nine years previously.

In 1903, when he was barely out of the University of Michigan with his law degree, he was elected to the state senate. That was when he began making an astute reputation in the law. He is a native Detroit.

A small man, the judge looks diminutive surrounded by his huge shelves of law books. His pictures give him a stern appearance but he laughs readily and hooks his heel up on his desk when hobnobbing with a visitor. Cigars are his only apparent indulgence.

Judge Simmons, who has written "many hundreds" of opinions for the appeals court, takes his work in stride.

"I don't have any difficulty," he said. "When I leave my chambers here, I leave my work here, too."

At 70, his hair is by no means all grey. It's only streaked with grey. For recreation Judge Simmons has his "little golf in the summer, little bridge in the winter."

Obituary

MRS. MINNIE THOMPSON
Funeral services for Mrs. Minnie Thompson, which were largely attended, were conducted at 2:30 o'clock Saturday afternoon at the Alto funeral home with Rev. A. L. Colegrove, pastor of the Pentecostal Assembly church, officiating.

Mrs. Walter Hanson sang, "Old Rugged Cross", and Mrs. Fred Kositzke, "Some Day We'll Understand". They were accompanied by Miss Linnea Sundman.

Burial was made in the family lot in Lakeview cemetery.

Pallbearers were Gilbert Taylor, Elmer Walch, Walter Fleury, Paul Ring, Walter Cook and Clifford Labombard.

Out of town people at the services included Mrs. R. Erdman, Dodge City, Kas.; Charles Thompson, Muskegon, Mi. and Mrs. John Thompson, Betty Thompson and Mrs. Mary Thompson, Milwaukee; Mr. and Mrs. Thompson and Marion Thompson and many other Cornell residents also attended the services.

Moon To Partially Hide Sun May 30

Washington — The moon will partially hide the sun Thursday, May 30, but few people will have an opportunity to see it. The region of visibility is in the South Pacific, between New Zealand and the southern part of South America.

In mid-Pacific, where it is at a

maximum, only about 89 percent of the sun's diameter will be hidden. The greatest eclipse will occur at 4:00 p. m. Eastern Standard Time.

Except for a few Pacific islands, the only land where it will be visible is Chile and possibly western Argentina. There the eclipse will begin just before the sun sets, partially eclipsed.

Many Will Attend Youth For Christ Rally In Chicago

More than 100,000 people are expected to crowd into Soldier Field—scene of many of Chicago's biggest outdoor gatherings—on Memorial Day, May 30, when Chicago's Youth for Christ stages its second anniversary rally. It was announced by Rev. Birger Swenson, secretary of Upper Michigan Youth for Christ.

The holiday gathering is expected to be the largest single religious assemblage in Chicago history, with people from the entire state of Illinois and mid-western states in attendance.

The rally is being held in cooperation with hundreds of Protestant youth leaders and pastors to make it an evening to be remembered.

Musical highlights of the evening's program include the singing of a 5,000-voice choir directed by Prof. Talmadge J. Bittkofer, musical director on the round-the-world radio hour, "America Back to God"; Song Leader Strat Shuffelt, former choir director at Moody Memorial church in Chicago, leading the 100,000 people; and a 500-piece massed band led by Col. Harry Otway of the Salvation Army and Elmer Wittkoff, director Youth for Christ band.

Principal speaker will be Dr. Charles E. Fuller of Los Angeles, founder and director of the "Old Fashioned Revival Hour" radio broadcast. Dr. Torrey M. Johnson, director of Youth for Christ International, who will fly back from Europe in time for the rally, will offer a missionary challenge and relate his experiences at the huge youth rallies held in England, Scotland, Ireland, Norway, Sweden, Denmark, Holland, Belgium, and Switzerland.

The program will start promptly at 6:10 p. m. with a parade of floats, marching groups, community singing, and musical numbers.

This year's service will take on a patriotic, missionary, and evangelistic emphasis, with a 400-foot wooden cross and a replica of the Unknown Soldier Monument slated to be placed on the playing field. In addition, people dressed in the clothes of the countries to which the United States has been sending missionaries for many years will present a review of nations.

With "geared to the times but anchored to the Rock" as their theme, the Youth for Christ programs in all parts of the country have been attracting more than a million and a half of America's young people to the Saturday night rallies. Since Youth for Christ's inception two years ago, over 800 towns are staging such rallies.

Powers

Pine Topics Published
Powers, Mich.—The second edition of "Pine Topics" has been received by those of us who have been fortunate enough to get them. The new mimeographed paper is the work of patients at Pinecrest Sanatorium and is for the patients. Subscription rates on request. Contents read thus: "History of Pinecrest Sanatorium," by John W. Towey, M. D., continued into several issues. "The Question Box," "The Editor's Desk," etc.
The staff consists of editor, M. Newitt, associate editor, L. Forster, Cir. manager, K. Burley, Art director, S. Steele, and its reporters, L. Forster, D. Dube, Z. Fajlich, J. Tarnowski, D. Jackson, D. Knutson, E. Spitzer, and M. Sundin. The advisory board, John W. Towey, M. D., Chester S. Koop, M. D., Miss Mary Anderson, R. N., and Miss Virginia LeClair, rehabilitation director.

Personals
Mrs. Charlotte Nelson of Chicago, and son-in-law and daughter, Mr. and Mrs. Wm. Preacher of California are visiting with relatives here and in Wilson this week.

Mr. and Mrs. George Sohn and daughter, Charlene from S. Sioux City, Nebraska, spent several days at the home of Mr. and Mrs. Tim Loeffler. They came to attend commencement exercises in which Dick Loeffler was a member.

Mrs. Evelyn Fazatte visited with her daughters in Beaver, Wis., for a few days of the past week.

Miss Marvel Fazer spent the week end at the home of her sister, Mrs. Eval Fletcher in Hermansville.

Miss Isabel Carbis of Iron Mountain, gave a free demonstration lesson in cooking, in the Home Economics room, on Thursday evening, May 23, beginning at 7:30. The demonstration is sponsored by the Wisconsin-Mich. Power Co.

Bridal Shower
A large number of friends and relatives from Powers and Spalding attended a bridal shower for Mrs. William Preacher, formerly Elsie Lou Nelson, Tuesday evening in the Enfield home, in Wilson. Cut flowers were used throughout the spacious rooms, and cards and games formed the entertainment for the large number who attended.

In the card games, Mrs. Holger Nelson won first prize and Mrs. Hans Nelson the low. In the bunco games, Mrs. Earl Dubois and Mrs. H. L. Olson. Refreshments were served at the close of play. Mrs. Preacher was the recipient of an array of beautiful and serviceable gifts from the assembled guests.

Mr. and Mrs. Preacher will motor back to their home in California in a few days.

Protecting the Public

It is a principle of law, confirmed by numerous court rulings, that labor cannot legally strike against a unit of government, whether national, state or local. This judicial tenet, of course, has not proved effective in preventing such strikes and they have occurred, without regard for the law, on numerous occasions throughout the country.

The legal principle has been flaunted rather generally by labor unions until now we have reached the situation in which an illegal strike is choking the economic life of the entire country. The railroad strike is illegal because it is a strike against the government of the United States, which seized control of the railroads when the labor dispute reached an impasse between the operating brotherhoods and the railroad companies.

The principle of the illegality of strikes against government units is predicated upon the necessity of protecting public interest in essential functions. The same principle is contained in the governmental seizure of the railroads, continued operation of which is certainly vital to the public interest.

The time has now arrived when the principle of the law must be implemented by adequate penalties to guarantee enforcement of the law. We know now that we cannot prohibit strikes against the public interest merely by making such strikes illegal. First of all, unions will have to be made responsible for their actions and this can be accomplished only by the adoption of legislation to meet this need. Then penalties must be established against unions which violate the law.

Unless this course of action is taken as a means of public protection, we will find that irresponsible unions can grab the nation by the throat any time they please, just as the railroad operating brotherhoods and the coal mine unions have done in the past several weeks.

Revolution in Railroad

The present chaotic state of railroading is only a temporary phase, but the real revolution in modern transportation has come of late in the research laboratories.

To meet the competition offered by the diesel-electric engines, the coal mining industries and coal-carrying railroads have pooled their resources in an effort to develop a superior coal-burning locomotive. Their efforts have finally borne fruit, for successful tests are now being made with a coal-burning turbine engine, which will pull trains as fast as 1,000 miles without refueling.

The new engine operates on the same principle as the jet plane. It burns coal as fine as powder at extremely high temperatures, and creates tremendous power. It has the advantage of burning coal, a much cheaper fuel than diesel oil, and it has eliminated the dirt and other annoyances of old-fashioned coal burners. In fact, the new turbine engine promises white-collared jobs for the engineer and fireman.

While diesel motive power has been making great strides in the past decade on the railroads, there is the question in some minds as to how long the fuel oil supply will be available at reasonable cost. On the other hand, the supply of coal is still regarded as limitless.

It's A Disease

ALCOHOLISM is a disease that now afflicts about three million persons in this country, according to Dr. Selden D. Bacon of Yale university. As a disease, it tops cancer, which has about 500,000 victims, and tuberculosis with 700,000 sufferers.

Dr. Bacon declares that alcoholism is a public health problem, and that it cannot be met with 16th century attitudes and actions. Another medical expert, speaking at the recent National Conference of Social Work, stated that the most modern treatment for acute intoxication is a sub-shock dosage of insulin, which is neutralized later by dextrose.

The doctors contend that alcoholism is a disease that can be cured, all of which is encouraging for many unfortunate victims and their families. Medical science offers the main hope, for surely the answer to the problem is not in prohibition. That was tried before, but without success.

Money to Spend

STATE governmental expenditures in Michigan have risen from \$160,014,035 in 1937 to a total of \$281,000,000 in 1946, an increase of 76 per cent in the past decade, according to a report by Auditor General John D. Morrison.

Fortunately, tax revenues have been sufficient to meet the rising governmental costs, the report points out. The largest single source of revenue is the sales and use tax, which has more than doubled in the period. In 1937, revenues from this source amounted to \$54,780,117, and the

figure is estimated at \$112,000,000 for 1946.

Despite the steady increase in tax revenues, there never has been too much surplus cash in the state treasury. Some way always has been found to spend any extra money received from the taxpayers.

Memory Lane

THE decision of the Manistiquette post of the American Legion to establish a memory lane of trees along the highway approaches to their city is a very commendable one.

Escanaba's Memory Lane, along the west approach to Escanaba on Highway US-41, which established a number of years ago by the Cloverland post of the American Legion, shows how beautiful and effective such a memorial tribute to fallen heroes of the wars can be.

Trees talk a universal language. Silently they tell a story of service to mankind. In a majestic way, they serve as ever-present reminder of the service and sacrifice of those who gave their lives for their country.

Other Editorial Comments

DOGWOOD WINTER (Christian Science Monitor)

Just as Northern furnaces are being allowed to die down and householders are seriously considering replacing the storm windows with air-admitting screens, many sections of America experience what our grandfathers called a "cold spell" but which the modern weather reports, with euphemistic understatement, term "somewhat lower temperatures."

Overnight, the thermometers drop from the summery 70's to the nearfrigid 40's, and gardeners, especially those who have gone in rather heavily for beans, anxiously scan neighboring rooftops for evidences of frost. The velvety south wind has given place to a roguish blast from the north that plays pranks with the new-fledged trees and conveys a grim reminder that while the vernal period may be at hand, winter is still lurking just around the corner. Ventures out of doors remark that "it's almost warmer outside than it is in the house." In mid-Continent sections, where those trees are in blossom, this is called "dogwood winter."

Smoke from scores of chimneys tells of rekindled fires, while gas heaters, untouched since November, are lighted to furnish welcome warmth. Retiring, one is grateful for retrieved blankets. Morning, and the sun once more may be shining brightly, proclaiming that the "unusual weather" is at an end. Still, the cold spell has this advantage: It measurably heightens our appreciation of June.

ROAD TO PEACE (New York Times)

One reason for General Eisenhower's steadily mounting prestige is his commonsense approach to difficult and intricate problems. A second reason is his ability to express the problem clearly. A third is his always evident sincerity. All three were on display in his address before the closing banquet of the American Newspaper Publishers Association, where he discussed the international responsibilities of the United States and how we can best meet them.

The road to international peace, General Eisenhower said, is a three-lane thoroughfare, each lane of which must be traveled simultaneously; organized international co-operation, mutual international understanding and progressive international disarmament. No one has expressed better the fundamentals that must govern our actions.

There is no easy road to peace. There is not even a single road. It is a road of at least three lanes. It is a road, too, on which there is a speed limit, a road where the whole procession must be geared to the pace of the slower. Our problems are too complex to be solved by one conference, or by many conferences, by one meeting of the General Assembly of the United Nations or that of its Security Council. We will attain the ultimate goal of enduring peace only if we take General Eisenhower's counsel and think of the problems, work for their solution and accept the sacrifices they will entail.

Now comes the time of year when the worst tip anyone can give you is in a canoe.

People who kick about everything are the ones who will kick about nothing.

Take My Word For it . . . Frank Colby

SATURDAY ODDS AND ENDS

Grand Junction: Please give the origin and pronunciation of the word khaki.—M. A.

Answer: Khaki is a Hindu word meaning "dust colored." Uniforms of dust-colored drill are said to have been first worn by British and native troops in India in 1848. Today any drab or greenish-gray uniform is called khaki. In America, khaki is universally pronounced KACK-ee, to rhyme with "wacky." But our dictionaries still naively list the word with the British pronunciation: KAH-ki, the "i" short as in "kit."

Toledo: Which is the correct spelling, "pernickety" or "pernickity"?—D. A.

Answer: The expression "pernickity" is listed in Farmer's Dictionary of Americanisms (1899) as: "A New England Colloquialism signifying fastidious; overparticular." It perhaps was coined from "particular" plus "finicky." It is my brief, however, that the form "pernickety" (or "pernickity") prevails today among the relatively few persons who use the expression.

Monticello: A nationally known news analyst pronounces Miami as "mee-AH-

World Events Analyzed

BY MARQUIS CHILDS

Washington—In a world of bleak despair, Sir John Boyd Orr is a pillar of hope. This extraordinary Scotsman, with the burr in his speech and his bushy eyebrows like the crags of his native heath, is a practical idealist.

Orr, head of the food and agriculture organization, initiated the world food conference now meeting in Washington. Out of that conference there is a fifty-fifty chance of forming a new international food organization with powers to cope with the problem of hunger and famine.

As a young man, Orr started out to study theology. Then he came onto the Darwinian theory. He began to study science so he could know whether Darwin was right.

It was uphill going. He had to earn his own way for the most part. He taught school until he saved some money. Then he went back and took a medical degree and later an advanced degree in science.

—DECORATED FOR BRAVERY—

Orr became convinced that food, or the lack of it, was at the root of most human ills. He began tracking down scientific clues like a detective on the trail of a mass murderer. By the very intensity of his conviction, he brought others around to his point of view and before long he persuaded wealthy men to contribute to food research.

In World War I he enrolled in the Royal Army Medical Corps and served in the field. He was awarded two decorations for bravery. Out of the service he became director of animal nutrition at Glasgow university at a small salary. He worked in a basement laboratory. In 10 years he built this into the biggest food research center in the British empire.

Then came the opportunity for a remarkable study of people and food. Orr directed a research group that went to Kenya in East Africa to observe two related tribes. One was a tribe of Serfs that ate only cereals and milk. The other was a master tribe of blood drinkers and meat eaters.

Here was a fascinating contrast in habits, health and outlook on life. What he saw in Kenya tended to confirm certain of Sir John's theories about food and human behavior.

The African study was in a sense a preparation for what is Orr's most important contribution thus far. With the help of government funds, he started an investigation in Britain known as the food, health and income survey. It was a penetrating analysis, based on all available data, or how people lived and why.

Orr's report issued in 1934 was a bombshell. It showed that 50 per cent of the people of Britain did not have incomes sufficient for a diet that would assure them decent health. Ten per cent were definitely living on a starvation diet.

From the moment it was issued the Orr report became a political document of the first importance. It was a challenge to the conservatives. The laborites used it as proof that far reaching changes were necessary.

Incidentally the comparison with this country is interesting. The Orr report compares with the report of the national resources planning board which gave devastating proof that one-third of our population was ill fed, ill housed, ill clothed. That report, which might have served a comparable purpose here, never got into the stream of our political life. And for its pains the national resources planning board was liquidated by congress.

Orr is largely responsible for the excellent program of child feeding initiated in England with the start of wartime rationing and still continued. Members of Herbert Hoover's mission in England recently were enthusiastic about the results of this program. In his report on the state of child health around the world, Maurice Pate, a specialist in that field, wrote:

"England has the most advanced, extensive and generous system of supplementary child feeding of any country in the world. For supplemental feeding of school children, originally an allowance of 1000 calories, including generous portions of meat, cheese and fats, was made each day. Actually the children are able to consume only 600 to 900 calories daily."

The rising generation in England is expected to be three and a half inches taller on the average than any other generation and proportionately heavier. The reason is a benevolent, untiring, endlessly resourceful Scotsman named Orr. That may be why his small granddaughter calls him Popeye.

Good Morning!

By The Bugler

GOOD GUDDLING—Glenn C. Gregg, Marquette, regional supervisor of the parks and recreation division, Michigan department of conservation, says that guddling rates as one of his preferred ways of taking fish. Glenn was in Escanaba the other day in connection with some work that had taken him to Wells state park.

And if you don't know what guddling is, you're not alone.

Webster's New International Dictionary defines it as follows: Guddle—To catch fish with the hands by groping in their lurking places.

If that definition leaves you groping in your lurking place, we'll ask Gregg to further define, with illustrations and examples, For Upper Peninsula waters provide plenty of good guddling, he says.

SNEAK ATTACK—Many years ago Glenn read a book in which guddling was described. The book explained that guddling is an old Scottish custom, originating in the days when, if a Scotsman wanted fish, he had to poach from the streams and lakes of the landed gentry. (This is an indirect argument for more public fishing grounds, otherwise everyone will have to guddle.)

The Scotsman not of the gentry would make his way to the gentry's fishing grounds, flop down on the ground near a lurking fish and guddle a few. In this way he would avoid detection, for he needed neither pole, line, hooks, sinker nor bait.

TICKLISH JOB—Guddling is a ticklish business—and the best ticklers are those who get the most fish.

The guddler walks along a stream or lakeshore until he spies a fish, which may be partly hidden under a log, rock or lily pad. Cautiously approaching the fish, the guddler reclines or kneels on the shore to make himself comfortable. Then slowly, carefully, he lowers his hand into the water to a depth equal that of the fish.

From this point it is pure technique, and success will depend upon your ability to move your hand so slowly toward the fish that it will not take fright. With the hand open and palm up, the guddler slides his hand beneath the fish—and with one finger gently tickles the fish's belly!

Gregg says this rather intimate and wholly unwarranted intrusion upon the fish's private life brings a final and amazing reaction. The fish will slide backward into the guddler's palm, ready to be grasped firmly and tossed out on the bank.

THE DEMONSTRATES—Gregg was not abashed when we laughed heartily at his description of applied guddling. He said he has been laughed at before and has had to demonstrate guddling to prove it to non-believers.

Just last Sunday at Marquette, he continued, he mentioned guddling to a friend who scoffed too loudly. Last Sunday Gregg took this friend and the friend's wife with him on a guddling trip to a stream in Marquette county. The only fish found there were some suckers—but the technique worked and several were taken. Before they left Gregg's friend was

guddling away like a hungry Scot.

GAME FISH, TOO—Other fish as well as suckers can be taken by guddling, Gregg reports. He said that he has caught brook trout, perch and even a bass by this method. The bass, however, was a tough customer and hard to take because of the sharp-spined back fin which can injure the hand.

THE GUDGEON—Mr. Webster's dictionary gives one other definition for guddling. The word in English is also defined to mean guzzling—but certainly this has nothing to do with taking fish, at least in the company we keep.

There is also a small European fish called the gudgeon, which is easily taken with the hands, and perhaps the word guddling derives from that. Incidentally, Webster adds that gudgeon also means a person who is easily "caught"—in other words duped or cheated. So if you want to, you can be a guddler who goes guddling for gudgeon. But don't feel gudgeoned if you catch none, for guddling is a fine art.

—Clint Dunathan

A whirligig microscope, used by scientists to compare different groups of bacteria, permits one to look two ways at once.

The most recent compilation reveals that nearly 4,000 tornadoes have occurred in the United States in the past 27 years.

A meat loaf with soya flour and grits can stretch three-fourths of a pound of ground meat from three to six servings.

Jiu-jitsu is not of Japanese origin. It was stolen from the Chinese and made a Japanese national sport.

The first railway bridge across the Mississippi was the Rock Island Railroad Bridge at Davenport, Ia., opened in 1856.

The railroads of the United States use 1,294,047 miles of telephone and telegraph wires in their operations.

Good Morning! INTO THE PAST

10 Years Ago—1936

Cleveland, Ohio—For the third time, Norman Thomas was nominated today as the Socialist candidate for president.

Conway, Ark.—Roger W. Babson, envisioning another world war before 1950 which might bring destruction to the great seaboard cities, advised college graduates today to plan their futures in interior America.

Dr. and Mrs. O. S. Hult, Gladstone, are the parents of a daughter, born Monday morning at St. Francis hospital.

A daughter was born Saturday to Mr. and Mrs. Leslie Doty at St. Francis hospital.

Nahma — The South Siders handed Nahma a 10 to 2 defeat in a game here Sunday afternoon.

20 Years Ago—1926

The annual city budget, providing for expenditures of about \$130,000, was adopted by the city council at a special meeting held last night.

A son was born May 18 to Mr. and Mrs. Herman Peterson, 420 North Mackinac avenue, Manistiquette. The child has been named Melvin Clarence.

Miss Marion Noonan will leave tonight for Evanston, Ill., to resume her studies as student nurse at St. Francis hospital, after a visit at the parental home.

Harry A. Compher, commander of Cloverland Post, American Legion, was appointed by the city council last night to the chairmanship of the local sesquicentennial celebration committee.

Write your question clearly, sign your name and address, and (IMPORTANT) MAIL THIS COUPON and a 3-cent stamped, self-addressed envelope to (Escanaba Daily Press) SERVICE BUREAU 1217 Thirteenth St., Washington 5, D. C., for a personal reply. Don't telephone; write as directed.

G. I.—VETERANS SERVICE

Q. Is the discharge emblem and lapel button the same?

A. When separated under honorable conditions, each veteran receives a discharge (cloth) emblem to be worn on the uniform and a metal lapel button to be worn on civilian clothing.

Q. Is it possible for a veteran to attend school under the GI Bill of Rights and qualify for a GI loan at the same time?

A. Yes.

OF GENERAL INTEREST

Q. What is attraction?

A. It is the force manifested by the mutual approach or cohesion of bodies. All matter is under the influence of attraction in some of its forms. Every particle of matter attracts every other particle, and is in turn itself attracted.

Q. One of the pupils in my fourth grade class has had a very serious accident which will necessitate a long and tedious convalescence. It may be several months before he can walk again. Can you suggest something that other pupils can do to help him pass the time away?

A. We suggest a "Card and Gift Shower." Ask the children who wish to help to bring cards with cheerful messages on them and others to bring each an inexpensive five or ten-cent gift. Send alternately one of the cards, signed by the pupil, depending on the child's condition and the approximate length of his stay in bed. When the cards and gifts are about exhausted, send an interesting story book with a note saying that the class hopes to see him soon. The child will look eagerly for the postman. Simple jig-saw puzzles are a help if the child is able to sit up.

Q. In two hand pinocle, is it compulsory to take a trick before making a meld?

A. Yes; According to the rules neither player can meld except immediately after taking a trick, and before drawing from the talon. Only one combination can be melded for each trick taken.

Q. What is meant by the term "Old Line Republicans"?

A. The term is used to designate the least progressive, that is to say the most conservative members of the Republican Party. It is a carry-over from the days when the Whigs were the political conservatives and the most conservative Whigs were called "Old Line Whigs."

Q. How much money was found in undeliverable mail at the Dead Letter Office of the Post Office Department in 1940?

A. In 61,130 letters, a total of \$85,326.69 was found.

Q. What preposition is used with the verb "suffer"?

A. From. One suffers from a cold; from the conduct of another.

The first railway bridge across the Mississippi was the Rock Island Railroad Bridge at Davenport, Ia., opened in 1856.

The railroads of the United States use 1,294,047 miles of telephone and telegraph wires in their operations.

The Washington Merry-Go-Round

BY DREW PEARSON

Washington.—John L. Lewis had a confidential conference with Labor Secretary L. B. Schwellenbach on Monday at which he gave definite assurance that his miners would stay on the job if the government took over the mines.

Here is what happened at the Ultra-Secret meeting.

Schwellenbach informed Lewis that Truman had decided to seize the mines and asked him if the miners would stay on the job when the truce ended. Lewis replied that he would cooperate in keeping the mines in operation adding, however, that he would first have to advise with his policy committee, a very perfunctory measure.

Lewis then inquired if the government would begin negotiation of a new contract with the mine union once the mines were seized. He was assured by the secretary of labor that negotiations would begin as soon as a government administration or coordinator was chosen by President Truman and Interior Secretary Krug. Hearings would be conducted on the proposed health and welfare fund, increased wages and other disputed matters Lewis was told.

Schwellenbach also assured the bushy-browed miners' boss that any wage increase decided on would be retroactive to May 13, though the miners returned to work under Lewis's truce order.

—CLUB OVER LEWIS—

If President Truman really had wanted to beat John L. Lewis to the punch, he could have scared him to death by resurrecting the St. Lawrence seaway previously urged by both Roosevelt and Herbert Hoover, but which has been gathering dust in the senate for months.

There is nothing that worried John L. Lewis more than cheap electric power—unless it be cheap natural gas. And Truman also has neglected one other club he could brandish over John L. Lewis—namely, the two government-owned pipe lines from Texas to the East coast which Texas natural gas operators want to take over.

With the threat of cheap natural gas piped into industrial Pennsylvania and New Jersey, and cheap electric power feeding the factories of New York State and New England, John L. Lewis might have started singing a less belligerent tune.

The 12-year fight over the St. Lawrence seaway is the greatest monument to effective lobbying ever seen in Washington. In part also it is a monument to congressional inertia. Both Republican and Democratic leaders have urged the construction of the water-way, by-passing the St. Lawrence river rapids and giving ocean-going vessels access to Duluth, Detroit and Chicago.

For a long time Senator Overton of Louisiana, who wants Great Lakes traffic to flow through New Orleans, blocked the St. Lawrence seaway. More recently a Senate Foreign Relations Sub-committee reported favorably on the seaway but the absence of Senator Wallace White, a Maine Republican, blocked a vote.

Meanwhile, Dutch and Norwegian steamship lines are getting the jump on American shipping by putting small vessels into trans-Atlantic service which can operate directly between Europe and Chicago. These boats will be shallow enough to navigate the St. Lawrence without a seaway, while large American vessels will be out of luck.

Meanwhile also, New England and New York industry operates at the pleasure of the bushy-browed gentlemen who heads the United Mine Workers of America.

—LEWIS'S NO. 2 FEAR—

Two companies have applied to the government for purchase of the big inch and little inch pipe lines laid during the war to carry oil to the East coast. But believe it or not, the federal power commission has not even set a date for hearing their applications. If the White House really wanted to put a bombshell under Lewis hearings could be started overnight.

The two companies applying for the pipe lines are: (1) Transcontinental which offers \$40,000,000; and (2) The Big Inch Gas company, which also offers 40 million, and was organized by Oscar Cox, former assistant solicitor general of the justice department. Both companies have already made arrangements with the big utility companies in New York, Pennsylvania and New Jersey to sell all the gas they can deliver.

—TRUMAN PEEVED—

Inside fact is that the leaders of the railway trainmen and engineers, Brother Alexander F. Whitney and, Brother Alvanley Johnston, came back to Washington to resume negotiations with no assurances from carrier spokesman of concessions.

Furthermore, Harry, once the great friend of rail men, is now in no mood to pamper either brother Whitney or brother Johnston. He was peeved about the short five-day truce period they set, felt it would be almost impossible to iron out an agreement in so little time and minced no words in conveying his feelings to aids.

The President also has had on his desk, while talking to Whitney and Johnston, a confidential report pointing out that the 16 cents an hour wage increase recommended for railway trainmen and engineers by the President's emergency board amounted to an 18 per cent boost which is as high a percentage increase as has been awarded by any fact-finding board in any other industry.

The President's emergency board, the report continued, pointed out that this was the top figure that could be reached in a cost of living adjustment.

Women's conversation usually concerns who, why, when and wear.

ATOMIC ENERGY FOR PEACETIME

Scientists Team Up To Harness Power For Beneficial Use

BY WILLIAM J. CONWAY
AP Newsfeatures Writer
Chicago, June 1 (AP)—Many scientists who had a hand in developing the atomic bomb for war have teamed up in projects to harness its mighty power for beneficial peacetime uses.

Their prime purpose is to gain a better understanding of atomic energy rather than to put it to work driving rockets to the moon. These men have pooled their talents in three new organizations at the University of Chicago—the institute of nuclear studies, the institute of radiobiology and biophysics, and the institute for the study of metals.

The institutes were conceived during World War II. Brainpower was recruited against stiff competition. The staffs were drawn, to a large extent, from the ranks of scientists who had been engaged in war tasks; from former enemy countries as well as the United Nations.

"The appointments," commented Chancellor Robert M. Hutchins, "place the university in a pre-eminent position in nuclear work." Samuel K. Allison, big, hard-driving director of the institute for nuclear studies, who participated in the first atomic bomb explosion in New Mexico, uses an analogy to illustrate the institute's position in the atomic era:

"Early men made fire thousands of years before they understood what made it burn."

The modern men who produced atomic energy want to find out more about the source of this energy. They want to find, identify and determine the precise power of new and more plentiful sources of this energy.

"The problem of what holds the particles together in a nucleus is essentially unsolved," says Allison, citing one of many remaining riddles.

His team now numbers 52 persons. There are two nobel prize winners—Italian-born Enrico Fermi and Harold C. Urey. Among others are Arthur J. Dempster, discoverer of U-235, and Edward Teller, a native of Budapest, Hungary, who worked on the Oak Ridge and Los Alamos bomb projects.

Van Meer

Van Meer, Mich.—Mr. and Mrs. Andrew Maholic and son Tommy were visitors at the Crosby farm Monday evening.

Lois Scott, a pupil from Melstrand, was taken home Monday afternoon on account of illness.

James Worthing Jr. returned to his home in Munising Saturday afternoon. He had been in St. Lukes hospital in Marquette for an appendectomy operation.

Mr. and Mrs. Ervin Russell and son Herbert, who are living at Wakefield for the summer, spent Saturday here at their home.

Mr. and Mrs. Luke Watson were in Newberry Sunday visiting their daughter and son-in-law Mr. and Mrs. Donald Johnson.

Patsey Wright, who makes her home with her grandparents Mr. and Mrs. Lenard Cobb Sr., was taken to St. Lukes hospital Tuesday afternoon.

There will be a youth rally at the Van Meer Baptist church Memorial day at 2 p. m. There will be a ball game, a supper at 7 p. m. and coffee and doughnuts will be provided by the church.

Rev. Warren Jolls was in McMillan Sunday attending the monthly Day of Prayer. The Rev. Minors of St. Ignace, Rev. French of L'Anse, Rev. Anderson of Ishpeming, Rev. and Mrs. Collins of Newberry, Rev. and Mrs. Van Antwerp of Munising also attended the meeting.

MACKINAC ISLAND—Old Fort Mackinac spreads its tasseled walls high above the business section of that island paradise, fifty called "The Bermuda of America."

Mackinac Island Looks To Peak Tourist Rush

BY THE OLD AAA TRAVELEER

Michigan's great summertime paradise of Mackinac Island is being furnished for its annual influx of beauty-lovers from all over these United States, and indications are that 1946 will set a new high record in visitors on the island. Just as new high records in every Michigan playground is indicated.

Long before the white man came into what now is Michigan, the Indians called it "The Great Turtle" because it rises out of the blue waters like that creature so sacred to the red man. Today it's looked upon as one of the continent's scenic gems, and certainly the most historic single spot in all of Michigan. And its beauty is as well known in Europe as it is right here at home. It's Mackinac Island.

Mackinac Island is, of course, one of the main ports-of-call on several of the lake cruises, and literally thousands of Michiganders and beauty lovers from other states have put into that northland gem for delightful hours of exploration. Mackinac Island, incidentally, is just about as well-known in California or Massachusetts as it is in Michigan, and its fame as a beauty spot has spread into foreign lands.

Indians Gave Name

The early Indians called the island "Michilimackinac"—"The Great Turtle"—because it rises from the water in the shape of that creature. You see, the turtle is the totem, or symbol, of everlasting life with most tribes. That is because the turtle, when it's time for it to die, disappears into the earth. The Indian, in his strange reasoning, believes that the turtle never dies, hence it has become his symbol of deathless existence.

While the Indians called Mackinac Island "The Great Turtle," modern day travelers call it the Bermuda of America—because the island is so much like that emerald gem set in the warm waters to the southward. Others, a bit more poetic, have called the island a cross-section of Paradise. And all of them are right, for Mackinac Island stands today as one of the most beautiful spots on this continent—and it would be extremely difficult to find another spot so rich in history.

ed the meeting. Rev. Anderson was guest speaker.

Mr. and Mrs. James Worthing Sr. were in Marquette Thursday evening to visit their son James and Rev. John Hamill at the St. Lukes hospital.

OUTDOOR HIAWATHALAND

By Vic Powers

Fishing Contest

Although adverse weather conditions have plagued anglers for almost every since the opening of this year's fishing seasons, some success has rewarded the efforts of those who braved the cold and then the rain. Reflecting that success were the entries in the brook, rainbow and steelhead trout, northern and walleyed pike classes of this year's Daily Press fishing contest. The entries were for some very fine fish.

However, it was not until Wednesday that the first of the pan-fish classes recorded an entry. That was for a rock bass weighing exactly 16 ounces caught by

early Indians believed was built by the fairies as a gateway to the island. And, of course, there's the towering pinnacle known as Sugar Loaf, which the Indians tell you—even to this day—was the wigwam of Manabogho, who re-created the world after the Deluge.

Discovered by Nicolet

Jean Nicolet, the Frenchman, probably was the first white man to sight Mackinac Island, for he canoed through the Straits of Mackinac around 1634 as he hunted a new waterway to the Orient. In later years the high cliffs of the island were seen by missionaries, voyageurs and fur traders, but it was not until 1670 that the island really began to attract attention. In that year Father Claude Allouez mentioned the island in a letter, and a year later Jacques Marquette founded a mission at St. Ignace and canoed across the Straits to visit the island. A few years later LaSalle landed on the island when he passed through the Straits in his ill-fated Griffon. The Indians called the Griffon, the first sailing vessel on the Great Lakes, "The Great White Bird."

Well, let's sort of jump over the years and have a looksee at the Mackinac Island of today. The first thing to strike you, of course, is the absence of automobiles — you'll explore the island in a horse-drawn vehicle. You'll see St. Ann's church, and on that church a bronze plaque tells you that this was the first parish in the United States dedicated to the memory of the mother of the Virgin Mary. That was in 1695.

The original St. Ann's, of course, was built on the mainland within the original Fort Michilimackinac, and when the fort was transferred to the island, the church was dismantled and transported, log by log, across the ice of the Straits for re-building.

Then there's Arch Rock, over on the eastern shoreline, a rock bridge 149 feet above the lake, with a span of 50 feet, which the

Lionel Tyrrell, 211 Schoolcraft Ave., Manistique while fishing in the Indian River. It was 10½ inches in length and 9 inches in girth.

Recent questions by fishermen indicate there is a certain amount of misconception of the regulations which leads some anglers to pass up the tasty food that follows the fun of catching a mess of panfish. The bass, largemouth and smallmouth, bluegills and sunfish are the only species on which the season is closed in all waters at present. All other species are fair game in Upper Peninsula waters.

Gray Fox

A report last week by the conservation department that a few gray fox had been taken in the Upper Peninsula serves to illustrate how animals change their habits and also how painfully slow has been the process of assembling accurate knowledge on the wild creatures.

Research by naturalists in the early part of the last century revealed that the gray fox was known to the Indians but the red fox was unknown in the eastern part of the country before Europeans settled. It was known that soon after the English came they imported the red fox from their homeland to furnish sport. That led to a belief that the gray fox was the native and the red fox a foreign interloper.

Lending support to this theory was the work of Prof. S. F. Baird, who wrote, in 1857 of the fact that no remains of the red fox were found among the fossils in the bone caves, yet remains of the gray fox were abundant.

Still later Seton uncovered information which established the red fox as a native of the northern part of the continent with a southern range limit somewhere between Latitude 45 degrees north, near the Marquette-Ontonagon county border in Wisconsin, and Latitude 40 degrees north, a little over fifty miles south of the southern end of Lake Michigan.

The European red fox was introduced about 1750 and in the east the two species became mixed and, with the change in the character of the land wrought by the white man, spread until today the red fox may be found almost as

far south as the Gulf of Mexico.

At the same time the gray fox, believed to have been originally confined to the southern part of the country, extended his range northward until in 1914 the gray fox had been recorded from Gogebic and Delta counties in the Upper Peninsula. The recent reports from Alger and Delta counties is elaborated upon by A. M. Stebler of the Cusino Wildlife Experiment Station, as follows:

"The silver-gray flash of the brushlands may be establishing himself more securely in the central region of the Upper Peninsula. A pelt taken by a bounty trapper, and about which there was some question as to identity, was recently identified at the Cusino Wildlife Experiment Station as being from a gray fox. The animal was taken in Delta County, not far from Trenary. Since this determination was made, the station has received a report that another trapper took two specimens last fall near Rock River in northwestern Alger county.

A Climber

"While the northern gray fox is considered a forest dweller, all forest areas do not appear attractive to him. The rough, broken, and rocky sections of forest lands

VFW MEETING CLOSSES TODAY

Parade At 12:15 Noon.
Banquet To Begin
At 1:15 P. m.

The big parade of servicemen on Ludington street and a banquet at St. Joseph's church hall will feature the closing day's program of the annual Upper Peninsula convention of the Veterans of Foreign Wars in Escanaba today. William Tarr of Detroit, state V. F. W. commander, will be the main speaker at the banquet.

About a thousand V. F. W. members poured into the city yesterday afternoon and last night from all parts of the peninsula. Highlight of the opening day's program was the well-attended dance at the V. F. W. clubrooms. The convention parade will start from the junior high school at 2:15 p. m. sharp. The banquet will begin at 1:15 p. m. Rev. Francis O. F. M., will give the invocation, and Mayor Marvin L. Coon will preside as master of ceremonies. The St. Joseph's high school glee club, directed by Sister Mary Cedella, will sing a selection, and there also will be a vocal solo by Earl Owen. The blessings will be given by Rev. Fr. Alphonse, O. F. M., just prior to the address by Commander Tarr.

The banquet program will be concluded with an impressive ceremony in which more than a hundred new members will be initiated by the Sault Ste. Marie ritual team.

Officers will be elected and other matters transacted at the afternoon business session.

Middies Take Third IC4A Track Title

BY BUS HAM
Annapolis, Md., May 25 (AP)—The Navy's balanced power carried the Middies to their third straight IC4A track title today but the sailors had to win the mile relay in order to beat out fast-finishing Army.

Navy took the championship with 38 5/8 points to Army's 33 1/7 and a surprising Dartmouth team's third place total of 24 1/7. Twenty-four of the 33 competing schools shared in the point-making.

Navy won the relay when the results of three field events, the javelin, pole vault and high jump, still were unreported. The scoring was so close that the Middies realized they must win the relay in order to retain the championship.

This year they did handsily with Frederic Bouwman, James Carlisle, Arthur Bieley and William Kash leading virtually all the way. Kash had a 15-yard margin in the finish. Navy's time was 3:18.6.

Vote On Bond Issue To Finance Bonus Proposed By Sigler

Detroit, May 25. (AP)—Kim Sigler, candidate for the Republican nomination as governor, tonight proposed a popular referendum on a \$300,000,000 bond issue to finance a bonus for Michigan veterans.

In a radio address, he proposed the necessary petitions be circulated and the question placed on the November ballot.

Criticizing approaches of some of his opponents to the question, he said: "I cannot understand why anyone would consider paying the veterans of World War II less than the veterans of the first World War were paid. * * * Neither do I believe that the matter should be left until 1947 for determination by the legislature."

"Practically in every instance where the people themselves have had an opportunity to vote on important public matters," he continued, "they have invariably done the right thing, not only for themselves but for the state and nation."

Blasting the legislature for being "penurious and dilatory" in giving financial assistance to the state's schools, Sigler proposed the return of state sales tax money to meet what he called the school "emergency," adding "whether it amounts to \$15,000,000 or \$25,000,000."

The former grand jury special prosecutor ended his address pleading that "if I happen to be elected," the state fair grounds at Detroit will be opened as a recreation area.

Submarine Ear Locates Shrimp For Fishermen

Houma, La.—The Gulf shrimp, which has been hauled out in increasing volume as fishermen turned more and more to scientists and engineers for help, is really up against something now. Back from the wars, Maj. Joe Pullen of Houma and Albert E. Fletcher of Sardis are going after the crustaceans with a fisherman's dream-craft, the 83-foot "Sovereign."

The "Sovereign" has echo-ranging equipment that can spot schools of shrimp as well as it did submarines, a direction finder, a quick-acting motor-operated 150-foot trawl, quick-freezing vats and such refinements as ship-to-shore telephone.

And, because it's always possible to run into a few red snapper

LATE BUT RUNNING—The North Western's Peninsula 400 streamliner made daily runs between Ishpeming and Chicago during the rail strike, manned by supervisory personnel. Pictured at the Escanaba station yesterday morning on her return to Chicago, the 400 was late

but welcome. Although passenger service was off, the 400 provided the only means of transporting mail and express, and was delayed because of the many stops enroute. With the strike ended and service back on schedule the dining and parlor car, off during the strike period, will be returned to the train.

TELEVISION IS NOT ORGANIZED

But Some Of The Actors Belong To Four Unions

BY JEAN MEEGAN
AP Newsfeatures Writer

New York—One word that hasn't been mentioned in any of the public talk about the future of television is "union." The allied entertainment fields of radio, stage, screen, and vaudeville are dominated by the American Federation of Radio Artists, Actors Equity Association, Screen Actors Guild, and the American Guild of Variety Artists. But there is no comparable union for television. Actors with every size bankroll are coming into the new medium. There is no fixed standard for their wages. Exploitation is prevented by a committee of representatives from the four unions which keeps an eye on working conditions and recommends a minimum wage but actually this committee has had about as much power as the performers' parents. The real reason it exists is in its own phrase to "prevent jurisdictional disputes"—or intra-union rube and rows.

What Will Traffic Bear?
As one realistic labor union executive candidly conceded: "We are waiting to find out how much the traffic will bear. Why make contracts hastily now and repent later?"

The state of the union depends on the "box-office" and "the box-office" is dependent upon the number of television hours that are sold to a sponsor. So far there is only one hour in this happy category.

When it becomes clear what the real riches are going to be, and the moment is ripe for organizing, the question then will be: "How?" A union put together like the present committee with representatives of AFRA, Equity, SAG, and AGVA would seem sensible but that has mixed advantages and drawbacks.

What Will Novices Join?
It is reasonable to assume that they can make contracts satisfactory to their own members but what about the new performers who don't belong to one of the existing unions—what will they join? That is the \$64 question in the mind of the present committee.

"It's like the U.N.," one committee member commented, "each union would have to give in a little—and what about the treasuries?"

The alternative, of course, is another union but performers who already belong to two or three or four of the existing guilds are of no mind to pay dues in yet another.

"If merger is the answer, then there will be a merger," is the consensus of the present committee.

FORMER GOVERNOR DEAD
Helena, Mont., May 25 (AP)—John Edward Erickson, 83, three times governor of Montana and former U. S. senator, died here early today.

Erickson was the only person to win election as Montana governor for three successive terms.

Japs Are Sentenced For Beheading Nine Of Carlson Raiders

Guam, May 23 (Delayed) (AP)—Vice Adm. Kose Abe was sentenced to hang and two other Japanese received prison terms today for the beheading of nine of the famous Carlson raiders on Kwajalein Island in 1942.

The U. S. military commission sentenced Capt. Yoshio Obara to ten years imprisonment and Lt. Comdr. Hisakichi Nakai to five years for their part in the brutal executions. Abe was Japanese commander on Kwajalein.

The victims were among 14 Americans stranded on Makin Island during a sortie in August, 1942, fifteen months before the American invasion of the Gilberts. The raid was led by Lt. Col. Evans F. Carlson and Maj. James Roosevelt, son of the late president. Both officers later were promoted.

Armed Forces Give Up Hope Of Finding 12,000 Missing Men

Washington, May 25. (AP)—The army and navy today abandoned virtually all hope of finding more than 12,000 missing men for whom intensive search has been made in many parts of the world particularly since the war's end.

The search will continue but the war and navy departments said in a joint statement that reports from overseas commanders indicated that "there remains little or no possibility of finding any except a few who have been missing less than 60 days or were deliberately absent without authority."

Virtually all recorded as missing will continue to be so listed until a year from the date they disappeared. Then they will be officially declared dead or a review board may authorize a renewal of the search.

FALL KILLS AERIALIST
Detroit, May 25 (AP)—Wanda Charlton, 19, Wilmington, Calif., circuit aerialist (Barnes Bros.) who fell 25 feet from a ladder-trapeze at a performance here Wednesday night, died in Providence hospital of her injuries today.

No species of true antelope is native to North America.

(Continued from Page One)

"Our position still is that the president has just betrayed American labor—and the American public, as well."

The striking brotherhoods had offered to go back to work if they got the 16-cent raise and seven changes in working rules recommended by a federal fact-finding board, along with assurance they could negotiate with the president for more.

"These measures may appear to you to be drastic," Mr. Truman declared. "They are. I repeat that I recommend them only as temporary emergency expedients and only in cases where workers are striking against the government." But beyond these he suggested adoption of a "comprehensive labor policy which will tend to reduce the number of work stoppages and 'other acts which injure labor, capital, and the whole population.'"

Senate Holds Back
The right of workers to strike against private employers must be preserved, Mr. Truman asserted. But he asked Congress to set up a special Senate-Nouse committee to study permanent, long-range legislation designed to reduce the number of occasions for strikes in private enterprise.

The House, under procedure that choked off debate at the end of 40 minutes and required a two-thirds majority for approval, swiftly okayed the measure the president wanted.

The Senate, normally inclined to pass less stringent labor legislation than the House, argued about the Truman recommendations and got committee approval of them, but took no immediate action. Some leaders said it might be a week before the Senate voted.

Mr. Truman, however, had won a personal victory in the calling off of the strike. It took tremendous pressure to achieve it.

For 48 hours the walkout had all but stopped the pulse of American industry and the movement of food. It threatened, Mr. Truman told Congress, to "paralyze all our industrial, agricultural, commercial, and social life."

Statement Called Unfair
But he cautioned against action stemming from vengeance. He recited his own labor record as senator and president and said he would continue to urge retention of the benefits labor has won in the last 13 years.

"However, what we are dealing with here is not labor as a whole," he said. "We are dealing with a handful of men who are striking against their own government and against every one of their fellow citizens."

One of those to whom he referred—Whitney—termed the president's statement to the people last night "very unfair," even though it had "but little effect upon the men we represent."

And in explanation of the strike settlement, he declared in a statement dictated to reporters:

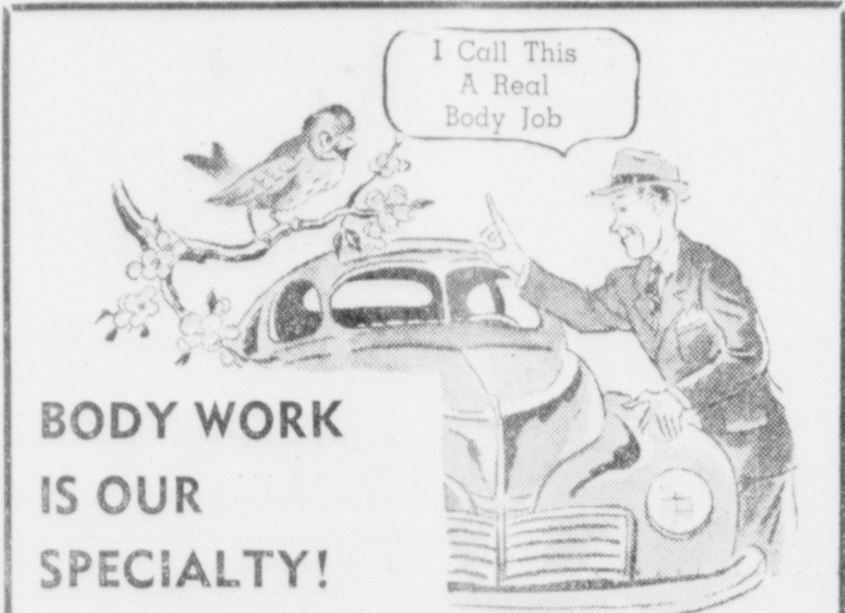

"We took this course in the interest of the public, realizing that a strike could not be continued indefinitely because of the need of food and the many other provisions necessary in our economy."

At one point during the day, the president abruptly ordered an end to direct White House dealings with the strikers. But that was before Whitney and Johnston produced a conditional offer to send their members back to work.

Huge Parade Will Highlight Detroit Memorial Day Rites

Detroit, May 25. (AP)—The first peacetime observance of Memorial Day in five years will be highlighted by the largest parade in Detroit's history Thursday.

A total marching force of more than 35,000 persons, including members of eight new veterans organizations, will participate.

Former Escanaba Man, G. W. Henke, Dies In Milwaukee

Gilbert W. Henke, former resident of Escanaba, died Saturday at his home in Milwaukee, it was learned here yesterday. He had been in ill health for some time.

Mr. Henke, a brother-in-law of Mrs. Juel Lee, 702 South 12th street, was a member of the Elks and of Delta Lodge 195, F. & A. M. His widow is the former Ruth Peterson.

The funeral will be held in Escanaba but arrangements have not yet been completed.

Jinx Broken; Bucks Defeat Michigan Trackmen, 67 to 55

Ann Arbor, Mich., May 25 (AP)—The Ohio State track and field team this afternoon broke a 29-year jinx at Ferry Field by defeating Michigan 67-55 and established itself as the squad to beat for second place in the Western Conference championships next week.

The Buckeyes, undefeated in outdoor season dual meets, were paced by Lloyd Duff, who scored first in the 120-yard high hurdles, 220-yard low hurdles, and the pole vault and took second place in the broad jump.

Although each team captured seven firsts, the Ohioans made a clean sweep of both hurdle events. Duff's running mate, Bill Seibert, took second, while Dick Maxwell ran third in the high and Lowe Shray captured third in the lows.

Michigan's Val Johnson was second high point man with firsts in the 100 and 220-yard dashes. He also ran the first leg on the Michigan mile relay team.

The Buckeyes also scored a virtual sweep of the high jump with Warren Orendorff and Seibert tying for first place at 6 feet 2 inches and Maxwell deadlocked with Michigan's Bob Harris in third place.

The Wolverines combination of Freshman Charles Fonville and Capt. Geo. Ostroot again stood out in the shot put and discus, with Fonville heaving the 12-pound shot 50 feet 2 inches for a first and Ostroot taking first in the discus with a toss of 145 feet 11 1/2 inches.

Briefly Told

GM 2/c Raymond L. Olson, son of Mr. and Mrs. Werner Olson, 805 South 18th street, has returned from Guam, after two and a half years of service in the navy. His ship was among those caught in severe typhoons of 1944 and 1945.

In ancient Egypt, the possession of shoes indicated the high rank of the wearer.

FLAGS For DECORATION DAY At Office Service Co.

FORD SEEKING TOP POSITION IN AUTO FIELD

(Continued from Page One)

wraps it bought a million sandbags from India; it flew into the factories many critical short items; to get gas tanks it furnished suppliers with steel from its own mills; it bought all the cushion springs it could locate but the supply has been inadequate.

Right now the assembly lines are closed "indefinitely" because of the company's inability to obtain materials. Chevrolet, too, is feeling the parts and materials shortages and has not been able to get into full volume production. Showdown In 1947?

Thus the battle between Ford and Chevrolet, which normally produce about half of all the cars made each year, apparently will be deferred by force of circumstances until 1947.

At that time Chevrolet, too, will have a new, lightweight, economy model and the real battle for top place in production and sales will be on.

The 28-year-old Henry Ford II apparently was given a free hand when he took over the company presidency from his famed grandfather late last summer. Prior to that time he had been executive vice-president for about a year. The elder Ford, who will be 83 years old next July 30, has retired from all active participation in company affairs.

Dropping of the vast rubber plantation project ended one of the elder Ford's fondest dreams—to bring back to the Western hemisphere control of the world's natural rubber supply.

Whether rapid progress in the development of synthetic figured

in the decision to relinquish the acreage can only be guessed at but, as a Ford associate succinctly remarked, "it cost a lot of money."

There are many other widely differing interests in the Ford empire—timber, coal and ore properties, sawmills, blast furnaces, steel mills, glass manufacturing plants, a fleet of ships and other enterprises.

Badger Baseball Team Wins Crown

Madison, Wis., May 25 (AP)—The University of Wisconsin baseball team won its first Western conference championship since 1930 today when it defeated Northwestern 6 to 0 behind the steady eight-hit pitching of Jim Lawrence.

It was the Badgers' ninth victory in 11 games. Northwestern 000 000 000—0 8 1 Wisconsin 420 000 00x—6 10 0 Stretton, Schultz (1) Schumacher (7) and Hedstrom; Lawrence and Kronenberg.

OUTSIDER TAKES RACE

Detroit, May 25 (AP)—Umpydan, a 10-1 outsider, splashed his way to victory in the \$10,000 Boots and Saddles handicap inaugurating the Detroit fair grounds racing season today.

A rain-drenched, chilled crowd of 24,226 hardy fans saw the five-year-old speedster beat George C. White's Diamond Dick by a length, with Sir Sprite third and the favored Many Lands fourth.

INDIA IS LAND OF MANY RACES

Religious And Political Divisions Present Many Problems

Washington—The Indians of India, to form a united nation with autonomy as proposed by England, face the difficulty of preparing a constitution acceptable to some 390,000,000 people of many races, many languages, many religions and many political divisions. The two greatest communal elements involved are the Hindus and the Moslems.

The size of India, its density of population, and its diversity of interests and modes of living due to its diversity of climates, are other factors that enter into a united nation. It is half the size of the continental United States; its density of population is five and one-half times as great, and its total population is considerably more than two and one-half times that of the American population.

India is somewhat the shape of a great headless sheepskin rug, with its left hand quarter extending to within eight degrees of the equator between the Arabian sea and the Bengal bay, and its right hand quarter projecting into the highlands between Tibet and Burma. Its left front quarter lies along the Arabian sea, and its right front quarter extends high into the snowclad Himalaya mountains.

These lofty, almost impassable, mountains effectively separate India from China and Burma, the countries to the north and east. The Iranian plateau lies to the west, and affords overland routes to India. The northwest boundary of India is the line between it and Afghanistan to the north, and Iran to the southern third.

India includes 11 major provinces, each with considerable independence; five minor areas administered by the central British government; and over 500 states under Indian rulers. British India is the 16 major and minor provinces. The states under Indian rulers are scattered about throughout these provinces, and vary greatly in size and importance. Together, however, they include approximately one-half the total area of the country.

The many races in India speak some 200 different languages. With so many different peoples, racial origins are incapable of exact definition. It is generally accepted, however, that, in remote antiquity, India was inhabited by a Negroid people, to which were added later Dravidian races from the west and Mongoloid races from the northeast. Hindi, Bengali and Urdu are the most important languages.

The principal religions in India are Hinduism and Mohammedanism, which together include nearly 310,000,000 of its 390,000,000 people. The Hindus outnumber the Mohammedans by over three to one. There are about 6,000,000 Christians in the country, large numbers of Sikhs and Buddhists, and other adherents of many religious groups, including some 8,000,000 of various tribal religions. The Hindus, however, constitute over 75 percent of the total population, and the Mohammedans, particularly, fear their strength.

Do Not Exercise If You Have Cold

Berkeley, Calif.—Exercise is bad for the common cold, contrary to some conceptions that a sweat will eliminate the ailment.

This is reported by Dr. Franklin Henry, assistant professor of physical education at the University of California, on the basis of experiments in which he tested 21 students under both conditions of good health and in the stages of an active cold.

Dr. Henry found that a person puts forth more effort when exercising with a cold than he does when in good health.

He said that while there is no significant difference in blood pressure or pulse rate, breathing performance for 15 seconds after exercise was significantly poorer in persons suffering from colds.

Dr. Henry also found, by analysis of the last bit of expired air after exercise, that there was a greater accumulation of carbon dioxide in the blood streams of persons with colds. He said this was probably due to a reduction in the individual's alkaline reserve, resulting in temporary hyperacidity in persons taking exercise with colds.

Street Car Jumps Tracks, 67 Women And Children Hurt

Pittsburgh, May 24. (P)—Sixty-seven women and children were injured, eight seriously, when a street car jumped the tracks in nearby Rankin today and careened into an iron pole.

The trolley was jammed mostly with shouting school children from Wilkinsburg schools on their way to a picnic at Kenwood Pleasure Park. As it rounded a curve, the weight of the passengers almost overturned the trolley. It swerved off the tracks and rammed with terrific force into the pole.

The pole ripped the yellow trolley apart from the center doors to the rear.

Women and children, bleeding and staggering, struggled from the car and its shattered windows. At a nearby home, a woman and two children were injured by collapse of a porch upon which they gathered to view the accident scene.

Grand Lodge Officers Of IOOF Here Monday

The Odd Fellows lodge of Escanaba will entertain the Grand Lodge officers of the state of Michigan on Monday evening, May 27, at the Odd Fellows Temple, North Tenth street, at 8:00 p. m.

Invitations have been extended to the members of the Odd Fellows lodges at Menominee, Iron Mountain and Manistique, to be our guests at this meeting.

Grand lodge officers from Lower Michigan who will be present are Acting Grand Master Earl F. Pfaff of Sandusky, Grand Warden Lowell S. Patterson of Flint,

Corbett Will Suit Has Been Withdrawn

Menominee—Will of Mrs. William Corbett, who died in March 14, has been admitted to probate by Judge Katherine Stiles Laughlin following withdrawal by Mrs. John D. Jamieson, of Detroit, the former Miss Elaine Corbett, of a petition contesting the will on grounds of undue influence in its execution. The estate is estimated at about \$27,000.

Under terms of the will a son, Major James I. Corbett, former Menominee city engineer, is named executor and after small specific bequests to Mrs. Corbett's four grandchildren and three friends, the estate is divided among her four children, Major Corbett, William Corbett, of Lyndhurst, N. J.; Stewart Corbett, of Rochester, Mich., and Mrs. David (Irene Corbett) Hardie, of Freeport, Ill. The will stated that Mrs. Jamieson was "being otherwise provided for" in a joint survival bank deposit she had with her mother.

Also named a beneficiary was Mrs. Corbett's sister, Miss Clotilda Gillick, of Menominee, for whom a trust fund of \$9,000 is set up and directs it be converted into annuities. Household furniture and clothing were left to Miss Gillick, except some antique furniture pieces and a milk coat which was bequeathed to Miss Hardie.

In an earlier will, drawn last October, Mrs. Jamieson had been named executor and was left an equal share in the estate along with the other children.

Wheat Bonus Ends; Jammed Elevators Can't Move Grain

Lansing, May 24. (P)—The 30-cent wheat bonus payment plan will not be extended beyond Saturday but farmers may make late deliveries under the plan to elevators which are now filled to capacity storage, Maurice A. Doan, state AAA chairman, said today. Doan said that many of the capacity-filled elevators would not be able to move grain out to make room for additional wheat brought in by farmers because of the railroad strike.

The quality under the delayed delivery provisions, farmers must sign a contract with the county AAA committees to deliver the wheat as soon as possible after the elevators are cleared, Doan said.

A total of 1,000,000 bushels of wheat has moved to market from storage on Michigan farms in the campaign for wheat to relieve foreign famine.

Hoeing Machine Inspects Plant Before Chopping

Washington—A hoeing machine, designed for thinning and weeding operations in such crops as sugar beets and cotton, "inspects" the plants with an electric eye before it chops out weaklings and weeds, sparing the stronger, more promising specimens. It is the invention of Leo A. Marhart of Monterey County, Calif., who has just been granted U. S. patent 2,400,562 on the device.

Mechanical cotton-choppers and beet-thinners have been invented, but they have the weakness of being entirely mechanical. They knock out predetermined spaces in the rows of young plants, and it is a matter of chance if they spare the right ones.

In Mr. Marhart's invention there is a revolving set of blades that block out whole segments of the line. Following after it, however, is another set of blades whose action is intermittent; they swing round and clip out finer bites of soil and roots only at the bidding of photocells that "look" at each plant through light filters and "decide" whether it is a weed or a desirable citizen of the crop community.

The local Odd Fellows lodge also has three hospital beds and two wheel chairs which, according to Harold Nygaard, chairman of the program, have been in constant use by the public of this county without any cost.

Judge Sharpe, active in lodge affairs, is a member of the Odd Fellows and Rebekah war council, the Odd Fellows youth program, and Odd Fellows and Rebekahs boys' and girls' Big Star Lake camp council.

The refreshment committee consisting of Wesley Hanson, Werner A. Olson and Oscar Seidenquist have promised a very delicious luncheon following the program.

Solar Plans Party For Its Employees

Management of the Solar Furniture Manufacturing company of Escanaba is planning a dinner and dancing party for its employees which will be held at the Dells Wednesday evening, May 29.

The employees and their wives, or husbands, or guests, are being invited to attend the dinner party, first of what is expected to be a series of such events. Dinner will be served at 6:30 o'clock, followed by dancing.

State's Veterans Discharged Through April Total 436,901

Michigan veterans of World War II discharged from the armed forces to May 1 total 436,901, according to the state's Office of Veterans' Affairs, Lansing. During April a total of 30,768 veterans received their discharges. There are 197,604 Michigan men and women still in service.

The swallow-tailed kite, graceful bird of the Gulf States, eats prey held in its claws while leisurely gliding through the air.

LIBYA HOLDS KEY POSITION

Colony In North Africa Important Because Of Location

Washington — The Libya of North Africa, future political control of which is still an undecided matter at the Paris meeting of the "Big Four" Foreign Ministers, is not the Libya of the ancient Greeks, from which the name was taken by Italy, but consists in part of areas formerly known as Tripoli and Cyrenaica, Libya to the Greeks was a general term for all North Africa. The international importance of modern Libya lies in its geographical location.

Tripoli, called Tripolitania by the Italians, was under Turkish control until it was annexed by Italy in 1912, along with Cyrenaica, sometimes referred to as Benghazi or Bengasi. Between 1920 and 1925, Italy added to its Libya considerable desert land to the south and east, and also, by agreement with Egypt, the famous Oasis of Jazhbul. This oasis was occupied by the Italians in 1926.

The present Libya has an area of about 400,000 square miles, approximately the combined area of Texas and New Mexico. The northern half is agricultural and grazing country, the south is desert, mostly Arabs and Berbers, but with nearly 50,000 Italian colonists. Libya had economic value to Italy. Its lands furnished settlement areas for part of the surplus Italian population, and also provided grain, meat and other foods for Italians in Italy.

Northern Libya is divided into four provinces, all bordering on the Mediterranean sea. These are Tripoli or Tripolitania, Misurata, Benghazi and Derna. The desert to the south is known as the Military Territory. From east to west, Libya extends some 850 miles, although its coast line is somewhat longer. Its southern border is from 400 to 600 miles inland.

From the international standpoint, Libya is important because of its strategic location. Its several ports might make excellent naval bases. Lying just south of both Italy and Greece, only from 300 to 600 miles away, it presents a threat to Mediterranean sea lanes by airplane bombing if controlled by an enemy.

England's interest hinges on the desire to keep the Mediterranean open to British shipping to the East by way of the Suez canal. Malta, Britain's island stronghold south of Sicily, positioned where it can largely control passage from the East Mediterranean to the West Mediterranean is but 200 miles from Tripoli city.

British soldiers are called "Tommy's" because the British war office once supplied the soldiers with a pocket manual in which sample forms used the name "Tommy Atkins" to designate the British soldier (as we might use "John Doe" as our hypothetical American private).

In the new process, the objects to be plated are immersed in the usual silver cyanide bath and the negative current, that causes the deposit of silver, is sent through. This negative current, however, is interrupted by intermittent positive charges, and these cause the luster. The positive current, of about four times the amperage used to plate the metal, is applied for a few seconds, discontinued, and sent through several times again. Any silver removed by the positive current remains in the bath.

Now a secretary at the International Prosecution Section in the Japanese capital, she was formerly secretary to Sen. Carl Hatch, of New Mexico. (NEA Photo.)

NEW AFRICAN PARKS

Pretoria (P)—Kenya is planning to establish four national parks. One of them will be about 10,000 square miles in extent—nearly three times the size of the Yellowstone National Park, and about 2,000 square miles larger than South Africa's Kruger National Park which has been visited by many Americans.

From the international standpoint, Libya is important because of its strategic location. Its several ports might make excellent naval bases. Lying just south of both Italy and Greece, only from 300 to 600 miles away, it presents a threat to Mediterranean sea lanes by airplane bombing if controlled by an enemy.

Many Local Vets Taking-On-The-Job Training In County

Seventy Delta county veterans are preparing themselves for business or industrial careers with the aid of the government in the local on-the-job training program, and it is expected that many more ex-soldiers and sailors will soon avail themselves of the opportunity for similar training.

The plan provides for a government subsidy to veterans employed at a beginner's or apprentice wage by any approved employer during the period of training.

Thirty-two county business and industrial firms have been given approval for on-the-job training programs and ten more in Escanaba are making arrangements now to set up similar programs.

The U. S. Employment Service office here is cooperating with county and local school officials in aiding interested employers to initiate the veteran training plans in their offices, stores or plants.

Employers may secure full information about on-the-job training from the U.S.E.S.

Following is a list of business places now training employee veterans: Fair Store, Ludington Motors, C. R. Meyer & Sons, Northern Motor, Maytag Services, Groos & Co., Household Electric, Alfred Brandt, Wickert Floral Co.,

Elmer Beaudry garage, E&LS railroad, Henry Koehler, Brackett Chevrolet, Escanaba Motor, Home Supply, Wilbert Burial Vault Works, Arnold Nygaard, Montgomery Ward, Degrand and Brisbane, Nantell Electric, Moersch & Degnan, Farm Supply, Arthur Bolm, Hanrahan Main store, Needham Electric, Peterson & Jacobson, Erling Arntzen, Escanaba Daily Press, Richie Electric, I. R. Petersen, Provo Sign Service, Leonard A. Winling.

County Pays \$2,250 In Fox Bounties

Danville, Ill. (P)—The red fox business is booming in Vermilion county. Four hundred and fifty were killed in three months. The killers, receiving bounties of \$3 per head, collected \$2,250. The payoff for the champion hunter, who shot 98, was \$490.

The Young Women's Missionary Society of Bethany Ev. Lutheran church will meet Monday evening at eight o'clock.

Presbyterian Ladies' Aid
The Presbyterian Ladies' Aid society will meet in the Guild hall Tuesday afternoon at 2:30 o'clock. The guest speaker will be Mrs. John J. Walsh, who will give a talk, "What Ceramics Mean to the Modern Homemaker." She will have a display of ceramics, and anyone owning good antique or modern china is asked to bring it to the meeting for display purposes.

Mrs. William Leiper will have charge of devotions, and hostesses will be Mrs. W. H. Dickson, Mrs. H. H. Thurber, Mrs. Fred Bode, Mrs. K. F. Harrington, Mrs. Stanley Beggs and Mrs. L. L. Farrell. All ladies of the church are invited, and may bring their friends.

Salem Lutheran Class
The confirmation class of the Park River Salem Lutheran church will meet Monday afternoon at 4:15 o'clock.

Men's Brotherhood
The Men's Brotherhood of the First Methodist church will meet Monday evening in the church parlors. The Rev. Gerald Bowen will be the guest speaker. Dinner will be served at 6:30 o'clock by members of the Women's Society of Christian Service.

DAV Auxiliary To Install Officers Tuesday, May 28

Due to a conflict with the high school graduation exercises, the meeting of the Escanaba chapter No. 24, Disabled American Veterans' Auxiliary, originally scheduled for June 6, will be held this Tuesday evening, May 28, at 8 o'clock at the city hall, at which time the installation of new officers will be held.

Members are reminded to bring their donations for the hospital box.

Last Minute Tips Aid June Brides

BY ALICIA HART
NEA Staff Writer

A June bride's trip to the altar is subject to some dismaying excursions out of the aisle if she doesn't take the slickness off the soles of her pristine shoes.

Because calamities from shoe-sole slips sometimes happen at solemn weddings, Wilma Allen, a bridal counselor, says she always tells her clients to wash off underfoot slickness with a Turkish wash rag.

Some more hints from Miss Allen may be useful to brides-to-be whose heads are too high in the clouds to think things through. One tip is to put lipstick on last. By last, Miss Allen means after the gown is zipped up and the tulle is anchored. This keeps down the hazard of smudging the all-white look.

If the bride will remember to keep the last two days before her wedding free of appointments—ALL dress-fitting, hair-dressing, party-going appointments, says Miss Allen—she'll be a more serene bride and a pleasanter companion on the honeymoon.

Honor Society To Hold Annual Banquet June 4

The annual National Honor Society banquet will be held this year on Honor Day, June 4, at the First Methodist church, beginning at 6:30 o'clock.

Wallace Watt, of the Michigan Child Guidance Institute, will be the guest speaker.

Alumni of the society who plan to attend the banquet must make reservations by noon, Saturday, June 1, by calling the senior high. Arrangements for the banquet are in charge of Don Wickholm, Sue Moran and Jack Schils. Members of the entertainment committee are Jack Finn and Bill Nimszky. LeRoy Finn and Helen St. Martin are in charge of the program.

Cloverland Assn. Will Hold Annual Meet At Calumet

The 31st annual session of the Cloverland Association, O.E.S., will be held in Calumet on June 20 and 21, with Lake Linden assisting the Calumet chapter.

Mrs. B. W. Hall of this city, worthy matron of R. C. Hathaway chapter, will act as presiding worthy matron for the initiation work. Mrs. A. N. Wilson, past president of Cloverland, will act as grand installing marshal of the newly elected officers. S. E. Dunn, worthy patron, is third vice-president of the association.

A number of members of the R. C. Hathaway chapter plan to attend the meeting at Calumet. The Four Leaf Clover Club dinner will be held on Thursday, June 20, and the Cloverland luncheon and banquet will be held Friday, June 21. All reservations for the dinners must be made by this Wednesday, May 29. Members who plan to attend should call Mrs. W. F. Kammer, 245, before that date.

Before you select a home, study some of the fine collections of books now on the market to help you plan wisely and well. Aids in selecting a site, samples of styling and types and periods of homes, ideas for interior decoration, color schemes, landscaping, financing and construction are but a few of the subjects honestly and soundly covered by available material compiled by well-known experts.

Munising city—Evelyn Hemmings, Frank Wise, Edmond Oas, Peter Flavin.

USES Office Urges School Children To Register For Work

Munising—School children, especially those of the 1946 graduating class, are urged by the Munising office of the United States Employment Service to register for employment, Walter C. Meyland, local manager, said yesterday.

Job openings are available calling for any age ambitious boy or girl and it is asked by the USES office that anyone desiring suitable employment for the summer or permanent jobs or those not attending school now, to register at the local office so their names will be available to employers.

Many persons lose out on good positions, he pointed out, because they have no way of getting in contact with an employer. It is the purpose of the USES office to keep that contact with places of employment and fill their needs through their files of registrants. The local USES office has contact with the local, state and federal labor market.

MISS MILLIE ZIEMAN

Munising—Funeral services for Miss Millie Ziemann, who died Friday, will be held Monday afternoon at 2 o'clock in the Beaulieu funeral home. Rev. Paul Hollman, pastor of the Pilgrim Holiness church, will officiate. Burial will be made in Maple Grove cemetery.

Pallbearers will be Oscar E. Oie, George Luel, Gunnar Bjork, E. O. Erickson, John I. Keeton and George A. Baldwin.

MRS. IDA KIVINIEMI

Munising—Funeral services for Mrs. Ida Kiviniemi of Chatham were held Friday afternoon at 2 o'clock in the Beaulieu funeral home. Rev. Armas Maki of the Finnish National Lutheran church officiated.

Pallbearers were Iven Lindfor, Alex Peterson, Jack Oja, John Berg, Erick Hakanen and Eric Erison.

Burial was made in Pine Grove cemetery, Slapneek.

Notice To Bidders

Sealed proposals will be received at the office of the Alger County Road Commission, Munising, Michigan, until 9:00 A. M. EST, Monday, June 3, 1946 for:

2 All Wheel Drive 5 - 7 ton Trucks
1 All Wheel Drive 7½-10 ton Truck

The right to reject any or all bids is reserved by the Alger County Road Commission.

All proposals to be in sealed envelopes and plainly marked as containing bids.

ALGER COUNTY ROAD COMMISSION
J. H. Gutiss, Chairman.

Mather PTA To Hear Piano Recital At Meeting On Monday

Munising — The Mather high school Parent-Teacher Association will hear a piano recital by pupils of Mrs. Lillian Dufour at their meeting to be held Monday evening at 8 o'clock.

Mrs. Bert Chase, PTA council chairman, will install recently elected officers of the PTA unit as part of the business meeting.

Those taking part in the piano recital will be: Judith Strand, Christine Richards, Bonnie Jean Farr, Julia Cooley, Betty Maxon, Winnie Kee, Anita Chaitry, Sue Mattson, Connie Perry, Eileen Perry, Robert Bjork, Joan Revord, Ella Mae Richards, Joan Miller, Joyce Nesberg, Elaine Fink, Carol Pelletier and Susan Spencer.

Red Sox Bowlers Of Munising Take City Championship

Munising—The Red Sox bowling team of the Munising city league took the "grudge" games against the Tigers in the finals held Friday evening to become the undisputed bowling champions of the city of Munising.

The "Tigers" took the first game but the Red Sox made the evening play interesting by tying the win, taking the second game and finished the season's bowling by marking up a victory for the third game, taking the series.

According to a signed agreement Friday evening, members of the losing Tigers team are to buy dinners for members of the Red Sox winning team. Date and place of this event was not agreed on but will take place in the near future.

Munising K of C's
Do Degree Work In
Marquette Sunday

Munising — Three candidates from Munising will receive degrees in the Knights of Columbus at the state convention to be held in Marquette on Sunday.

Frank Chase and Howard Parr will receive all three degrees and James Crane will receive the second and third degrees.

Grand Knight Ernest Johnson and Financial Secretary William Miller are the Munising delegates to the convention; Henry St. Martin and William Dore are alternates.

The state convention began Saturday afternoon and will continue over Sunday and Monday. A number of members of the Munising council plan to attend the Sunday meeting.

ORDER OF RENEBERG
Munising—The Order of Reneberg will meet Sunday evening at the home of Mr. and Mrs. Ernest Schultz.

LEGION MEETING
Munising — The American Legion will hold a meeting Tuesday, May 28, at the American Legion County club. The meeting will begin at 7:45 p. m.

Stop Making Bombs
Psychologists Urge

Washington—Psychologists have presented the atomic scientists and the nation with a five-point program for the psychological control of the atomic energy problem.

1. The atomic bomb danger must be understood by everybody.
2. The promise of peaceful use of atomic energy must be emphasized.

3. An effective civilian control of atomic energy must be instituted in our country.
4. International control must be an immediate next step.

5. We must stop making atomic bombs immediately.
"No atomic bomb can declare war," the statement issued today states, "only man can do that."

"The fear that the atomic bomb has created can and must be dispelled by cooperative social endeavor," it is further stated in the pronouncement prepared for the Association of Atomic Scientists by the Society for the Psychological Study of Social Issues, a division of the American Psychological Association.

Charleson, S. C. (P)—John J. Murray, Atlantic Coast Line railroad agent, saved a concert by Eric Morini. The violinist's briefcase of music went on Florida bound, after she debarked from a crack ACL train.

Murray had the train make an unscheduled stop down the line at a whistle point. The briefcase was retrieved and shuttled back by a northbound train 10 minutes later in good concert time.

pelled by cooperative social endeavor," it is further stated in the pronouncement prepared for the Association of Atomic Scientists by the Society for the Psychological Study of Social Issues, a division of the American Psychological Association.

DEATH CLAIMS HAZEL DUNCAN

Was Active In Townsend
Movement; Rites
Tuesday

Mrs. Hazel E. Duncan, 53, wife of Lester E. Duncan, passed away at her home at Rapid River yesterday afternoon following a long illness.

Mrs. Duncan, nee Hazel Rice, was born in Menominee June 2, 1892. She was married in Toledo in 1926 to Lester E. Duncan.

Mrs. Duncan in recent years has been active in the Townsend movement in the Upper Peninsula.

Surviving are the widower, two sisters, Mrs. Wm. LaFond of Marquette and Mrs. George Muth of Millington, Mich., and one brother, Edward of Florida and Terre Haute, Ind.

The body was removed to the Kelley Funeral Home where it will rest in state beginning this evening.

Funeral services are to be conducted in the Congregational church at Rapid River Tuesday afternoon at 2 o'clock, the Rev. Hummans officiating. Burial will be made in the Rapid River cemetery. The body will be removed to the Congregational church one hour before the time of last rites.

Graduation Exercises At GHS Begin Tonight

Commencement exercises, which when completed mark the graduation of 67 students from Gladstone high school, will open this evening at 7:30 o'clock at the high school gymnasium with Baccalaureate exercises.

The farewell sermon is to be preached by Rev. C. V. S. Engstrom, pastor of the Mission Covenant church.

The Baccalaureate program: Processional—Graduates "Triumphal March" from Aida G. Verdi

Invocation—Rev. Glenn Kjellberg Nocturne in E Flat Major Chopin

Piano Solo—Betty Ann Bredahl Scripture Reading—Rev. C. V. S. Engstrom "Land of Hope and Glory" Elgar

"To Thee We Sing" Tkach "Onward Christian Soldiers" arr. by Simeone High School Mixed Chorus

Baccalaureate Address—Rev. C. V. S. Engstrom Benediction—Rev. Glenn Kjellberg Recessional—Graduates Orchestra

Welfare Club Tea
Monday Afternoon

The closing meeting of the Child's Welfare club is to be held Monday afternoon at the home of Mrs. S. R. Venne, 621 Michigan avenue, and is to be in the form of a springtime tea. It will begin at 3 o'clock with a business session after which there will be a program and the tea.

All members of the club are eligible to attend.

Forming the committee in charge are the Mmes. S. R. Venne, chairman, A. H. Miller, W. C. Cameron, O. S. Hult, L. N. Empson, J. F. Richardson, H. J. Norton, G. W. Jackson, H. G. Westcott and E. C. Olson.

Confirm Class At
Stonington Tonight

Six youths will be confirmed at services in Bethel Lutheran church at Stonington tonight at 8 o'clock. It is announced by Rev. Clifford Peterson.

Names of the children are Lois Bjurman, Esther Leadman, Ruth Fallstrom, Elaine Thorsen, Charles Erickson and William Hansen.

Rev. Fred Young To Superintend Work Of Church In District

Rev. J. Fred Young, pastor of Bethel Free church, is taking a 3-months leave of absence from his duties here during which he will superintend interests of the Evangelical Free church in the Great Lakes district, comprising three north central states.

Wallace Roseberg, who is completing his ministerial training at Bob Jones college, Cleveland, Tenn., will occupy the pulpit during Rev. Young's absence. He completes his training on June 5 and will arrive here for the third Sunday in June. He will remain here until September.

STRIKES DELAY TELEPHONE CO.

Timetable For Providing
New Services Gets
Setback

Detroit — The Michigan Bell Telephone Company today announced that continued material shortages and strikes, including those "in some of our Bell System factories," has brought a severe setback to its timetable of providing service to all who want it.

Thomas N. Lacy, president of the company, said that on "the bright promise of rapid reconversion to peacetime production on the part of all industry after V-J-Day," Michigan Bell had hoped to clear its waiting list by late this fall.

"That hope has been dashed," Lacy said. "Today, the best we can hope for is to get enough material so that most orders for service received before Jan. 1, 1946, will be completed by the end of this year. We also expect to fill many orders received this year in areas where sufficient facilities become available. It may be late in 1947, however, before we again can be on a ready-to-serve basis at all places."

"Of course, Michigan Bell will do everything it can to better this delayed schedule. But, just as in other industries, we cannot escape the mounting nationwide stalemate caused by building difficulties, production stoppages, and material shortages."

"We are trying desperately to provide everyone with some service as fast as it can be done. The company is using every piece of equipment it can get its hands on and exercising every ingenuity in this effort."

"We are risking a possible temporary decline in the quality of our service by crowding our equipment beyond its intended capacity in order to bring service to as many families as possible. The result may mean that dial equipment will not always be ready immediately to take the call, that the operator in manual offices may be slow to answer at times. New service, when available, is restricted almost entirely to party-line service in order that others, too, may have a telephone."

Kipling

Pre-Nuptial Shower

Kipling, Mich.—Miss Fernie Nasberg, lower grade teacher at the Kipling school, was the honored guest at a shower party held in the Town Hall Tuesday evening, May 21.

During the evening games were played and prizes awarded to the following winners:

Rummy: 1st, Mrs. Robert Larson; 2nd, Mrs. George Rivers.

500: 1st, Mrs. Wilbur Cowell; 2nd, Mrs. Harrison Spicer.

Bingo: 1st, Mrs. John Barak; 2nd, Mrs. Mildred Johnson.

Door Prize: Mrs. Mildred Johnson.

Immediately after lunch a surprise "Mock Wedding" was presented. Those taking part were:

Bride—Mrs. Zola Beauchamp.

Groom—Mrs. Flora Holmberg.

Flower Girl—Mrs. Phyllis Berglund.

Ring Bearer—Mrs. Hazel Johnson.

Minister—Mrs. Lydia Cowell.

Miss Nasberg received many useful gifts. On June 25, she will be married to Irvin Sviland of Escanaba.

Mr. Sviland is employed at the Marble Card factory in Gladstone. The couple will reside at 1113 First Avenue No., Escanaba, Mich.

Out of town guests from Escanaba included Mrs. Arne Sviland, Mrs. Alfred Sviland and Mrs. Ruth Varnberg.

Party arrangements were made by Mrs. Hugo Johnson, Mrs. Gunnar Holmberg, Mrs. Hector Berglund and Mrs. Louis Brock.

School Picnic

The annual community school picnic was held Thursday at the Pioneer Trail Park. Due to the morning rain lunch was prepared and served in the school dining room before the youngsters left by bus for the park. Contests were held and ice cream and cake served before they returned late in the afternoon. A number of parents from Brampton and Kipling attended the picnic. The P.T.A. members prepared the lunch which was served to about one hundred and thirty. In spite of the morning showers everyone had a grand time. Miss Nasberg, Mrs. Wixom and Miss Cretens were in charge of the games.

Honor Roll

May, 1945. This honor roll is based on scores made on the Standard Achievement Tests given this month.

Grade 8—Evelyn Lake, Rosalie Brock, Betty Miller, Newton Johnson.

Grade 7—Joan Arvey, Dean Colson, Beatrice Nebel, Harold Berg.

Grade 6—Roger Beauchamp, Lorraine Oja, Barbara Berg, Keith Colson.

Best attendance record for year—Rosalie Brock.

Perfect attendance for May: Rosalie Brock, Joan Constantino, Newton Johnson, Evelyn Lake, Betty Miller, Joan Arvey, Robert Cole, Dean Colson, Elaine Larson, Beatrice Nebel, Roger Beauchamp, Barbara Berg, Keith Colson, Lorraine Oja.

The pupils of the sixth and seventh grades and their teacher, Mary Cretens, made a field trip to Gladstone, Tuesday, May 21. They visited the Rialto Projection booth and saw how everything works in movie projection. They

Capt. John Allan Anderson

MEMORIAL SERVICES—Rev. and Mrs. John Anderson of Escanaba will leave Monday for Litchfield, Minn., where they will attend the memorial services to be held at the Mission Covenant church on May 30 for their son, Capt. John Allan Anderson, who is presumed to have lost his life in military service.

Captain Anderson was born in Cokato, Minn., Aug. 28, 1918. The family moved to Litchfield, Minn., in 1923, remaining there until 1932 when they moved to Crookston, Minn. While there Allan attended Crookston High school for three years, but returned to Litchfield and graduated from Litchfield High school, 1936. He entered the University of Minnesota 1937, and became a member of Alpha Rho Chi fraternity.

In 1941, he enlisted in the Navy Air Corps receiving his training in Minneapolis, Pensacola and Miami, Florida and was commissioned 2nd Lieutenant in U. S. Marine Air Corps in Aug. 1942.

Simultaneously, Aug. 28, he was united in marriage to Miss Denyse Willette Higley of Duluth, Minn. The marriage took place at Coral Gable, Miami, Florida. This union was blessed with a son, John Allan, Jr., born in Santa Barbara, Calif., Aug. 19, 1943.

Captain Anderson joined his squadron VMSB244, in Santa Barbara, and flew over Germany in Jan. 1943. He saw service in Hawaii, Midway and the Solomon Islands, took an active part in the Bougainville campaign and the bombing of Rabaul. He was reported missing over the New Britain Island on May 17, 1944 and was declared dead May 18, 1945. He was awarded posthumously the Purple Heart, and the Air Medal. Date of his death was most likely May 17, 1944, his age at that time was 25 years, 8 months and 21 days.

He is mourned by his widow, Mrs. Denyse Anderson (nee Higley) and the son, John Allan, Jr., the parents, Rev. and Mrs. John Anderson of Escanaba, Mich.; three sisters, Mrs. A. L. Swanson (Margaret) of Lake Forest, Ill., Mrs. Everett Olson (Connie) of Hinsdale, Ill., and Rosemarie of Minneapolis, Minn.; one brother, Grant, also of Minneapolis, recently discharged Lieutenant in the Marine Air Corps.

Need Riboflavin For High Flying

Berkeley, Calif.—The body cannot adjust to conditions of high altitude without an adequate supply of riboflavin, or vitamin B2, it is indicated in experiments at the University of California, which also provide further evidence that this vitamin is essential in carbohydrate metabolism.

If the body has a sufficient supply of riboflavin it makes an unusual adjustment to the low pressures of high altitude. The body burns up carbohydrates faster to do the job ordinarily done by a normal supply of oxygen at sea level.

Dr. Agnes Fay Morgan, noted nutritionist and professor of home economics, and Mary Wickson, researcher, found that in riboflavin-deficient rats this adjustment to an increased consumption of carbohydrate is not made.

However, if injections of riboflavin are given the deficient rats just before exposure to high altitudes, the adjustment is almost normal. The work indicates that persons flying at high altitudes be given adequate supplies of riboflavin. While the research was done to aid in combat warfare, it is also applicable to peacetime flying.

Dr. Morgan said also that the results may indicate that persons living in mountainous areas at high altitudes may need extra supplies of riboflavin to insure an increased carbohydrate metabolism to compensate for a decreased supply of oxygen in the air.

Dr. Morgan also said that the results may indicate that persons living in mountainous areas at high altitudes may need extra supplies of riboflavin to insure an increased carbohydrate metabolism to compensate for a decreased supply of oxygen in the air.

Mesabi Range Has Shipped Over 1.4 Billion Tons In 53 Years

The mining and shipping of more than seven million tons of Lake Superior iron ore was one of the noteworthy feats of 1889, yet it was quite apparent that the record soon would be surpassed. America's era of industrialism was under way. Faced with a seeming insatiable demand for steel, the hard-working men in the nation's iron and steel centers craved ever-larger quantities of the rich, uniform iron ore that was so plentiful in the new Lake Superior region.

That northern ore, which was then being supplied solely from the Marquette, Menominee, Gogebic and Vermilion ranges, made excellent iron which, when refined in Bessemer converters or in the newly perfected open hearth furnaces, became far better steel than the nation previously had been able to obtain in quantities.

Woodsmen Led to Search
The development of the Lake Superior region was really only in a modest stage, in 1889, however. Soon the giant range of all time, the Mesabi Range, was destined to be uncovered.

As early as 1886 large quantities of iron ore were reported seen in the rough wilderness north and northwest of Duluth by Henry H. Eames, a geologist. Three years later members of the Wieland family, living on the north shore of Lake Superior, told Peter Mitchell, a woodsman, about iron ore 40 miles to the northwest. In 1874 Prof. A. H. Chester, a geologist, a total of 613,620 tons. A year later, shipments totaled around 1,700,000 tons. Eight years later, in 1902, the Range shipped around 13,300,000 tons, more than 50 per cent of the total tonnage shipped by all ranges of the Lake Superior district. In 1905 shipments from the Mesabi Range exceeded twenty million tons.

The stripping of an area which became the world's largest open-pit iron ore mine started in 1905. It is the Hull-Rust-Mahoning mine, 2½ miles long, and from one-half to one mile wide, and more than 350 feet deep, covering some 1100 acres. It contains a total of more than 70 miles of railroad track.

Mesabi Shipped Over One-half

The name Mesabi means "giant" in the language of the Chippewa Indians. The range has been truly gigantic. From 1892 to 1945, inclusive, the Mesabi Range shipped 1,437,182,000 gross tons of iron ore, according to the records of the Lake Superior Iron Ore Association. That total was well over one-half of the 2,269,313,000 gross tons shipped by all the United States ranges in the Lake Superior district from 1850 to 1945 inclusive.

Still another Lake Superior range, in addition to the Mesabi, Marquette, Menominee, Gogebic and Vermilion, is the Cuyuna Range, which made its first shipment in 1911. This range is farther west than any other in the Lake Superior district, its western portion being crossed by the upper part of the Mississippi River.

In the Cuyuna area in 1892 and 1893, Henry Jajiri made a magnetic survey which showed favorable results. Cuyler Adams in 1895 examined lands south of Deerwood, where he found magnetic lines of variation. In 1901 C. K. Leith concluded that an ore formation might be found in the general area. In 1903 and 1904 several companies drilled unsuccessfully.

North Range Mined

Cuyler Adams, with William C. White and W. D. Edson, formed the Orland Mining Co. in 1903 and drilled into the Iron Range formations. In the Spring of 1904 good iron was found in a nearby location. Other explorations followed and in June, 1905, Hobart Iron Company sank the first shaft in the district. In the Summer of 1906, Oliver Iron Mining Co. began to sink an operating shaft on the Orland property at Rabbit Lake, but abandoned it before completion. This was the first attempt to mine on the North

Range. In June, 1907, Rogers-Brown Ore Co. leased this same parcel and got a shaft into rock in January 1910. This parcel became the Kennedy mine. Minneapolis, St. Paul and Sault Ste. Marie Ry. Co. built sixty miles of track to this mine, and from it, in 1911, made the first shipment of ore from the district. This shipment of 147,649 tons was the largest tonnage by a first shipper from any of the Lake Superior ranges. In 1910, Rogers-Brown Ore Co. started the Menominee mine, and in 1910 and 1911 sank shafts for the Ironsquois Iron Co. at Armour No. 1 and Armour No. 2 mines. In 1911, Inland Steel Co. sank the shaft for its Thompson mine. All these were on the North Range. In 1913, Virginia Ore Mining Co. shipped the first South Range ore, from the Barrows mine, near Brainard. By 1915, there were in the district ten producing mines which shipped 1,138,131 tons in that year, according to the Lake Superior Iron Ore Association.

Today Lake Superior mine operators make use of huge electric shovels, Diesel tractors, improved underground equipment and powerful locomotives. The ore is carefully graded and treated. Large fleets of vessels, some of them 600 feet long and costing more than \$2,000,000 apiece, carry the ore down the Great Lakes. Strong transportation links had to be developed so that large tonnages of ore from the various Lake Superior ranges could be transported quickly and cheaply to the iron and steel centers far to the south. Small sailing vessels were used initially but they soon proved inadequate because of their limited capacities. Prior to the construction of the canal around the rapids in the St. Mary's River, in 1855, four to five days were required to unload and reload small ships at the Rapids by means of wagons and wheelbarrows. At the lower lake ports, some of the later ships were emptied by an intricate method of building staging inside the holds, and shoveling the ore up from one platform to another.

With the coming of bigger ves-

sels propelled by steam, ore handling methods also were improved. Robert Wallace in 1867 utilized a donkey engine, with cables and winding drums, to hoist three tubs of ore at a time. John McMyler in 1884 adapted a revolving derrick. George H. Hullett in 1898 began construction of an automatic unloader which became a revolutionary device. Hullett mounted a bucket on the lower end of a structural steel "leg." This type of unloader was constantly improved and its capacity greatly increased.

Large Trucks, Conveyors Used

The ore industry has a well-deserved reputation for its long-range program of installing more efficient equipment. In recent years the trend in open pit operations has been towards greater use of trucks and truck-tailers to haul from the pits the ore mined by the power shovels, which scoop up many tons at each "bite."

As a further means of increasing production, some mines have installed conveyor belt systems. One of the longest single conveyor belts now used on the Mesabi Range is 1,750 feet long, built to deliver approximately 1,000 tons of ore per hour.

The Lake Superior iron ore mines and the fleets of vessels have been the "lifeline of the iron and steel industry." They have been very significant factors in enabling the United States to make the tools for its era of industrialism.

Priority On Trains

Washington, May 24 (AP)—The government strove tonight to hold the frayed threads of national communications together by:

1. Flying all long-distance first class mail; and

2. Placing a partial embargo on less urgent mail matter.

The ban on second, third and fourth class mail—including newspapers and magazines—applies only to mail ordinarily routed over railroads now blocked by strike action. A 16-ounce limit was ordered on first class and airmail by the post office department.

A frenzied busy Office of Defense Transportation took drastic measures, simultaneously, to make way for the mails on such trains as still are running.

Coal Strike Slows Chemical Industry

New York—A serious decrease in the production of synthetic organic chemicals is threatened as a direct result of the coal strike. Among the industries already feeling the pinch are: perfume and cosmetics; agricultural chemicals; pharmaceuticals; dyes and dyestuffs; and the plastics industry.

This is shown by a survey made by M. Lely Brannin, technical consultant of the Bituminous Coal Institute here.

Manufacturers of prime materials for weeks have been running on inventories. Production schedules have been cut drastically to stall of plant shut-downs. New commitments are not being

made because of the uncertainty as to when they can be filled. Production schedules of manufacturers of prime materials are at least 25 per cent under estimates for this date, and this represents a loss which can never be made up. There is question whether present commitments can be taken care of by the end of the year, even if the strike should end now. If the coal strike continues, the situation of course will become steadily worse.

A shortage of coal tar for the production of basic chemicals has been developing ever since about the first of the year, due first to the steel strike and later to the coal strike. Both strikes resulted in closing down of the byproduct ovens.

RAILWAY TIEP
PINCH IS FELT

Retarded Mail Service
Cause Of Greatest
Inconvenience

"Ain't it awful!" That is about all one has heard along Manistique's main thoroughfares since the railroad strike went into effect. The situation, however, is for the present, not as bad as the fears suggest.

A semblance of mail delivery has been maintained, a mail truck plying between Escanaba and Sault Ste. Marie making one round trip each day carrying first class mail and a few bundles of daily newspapers. Parcel post delivery for the present is out, and Postmaster Frank Gierke did not know when it would be resumed. First class mail for any regular destination will be received but its eventual delivery will be much slower than usual.

At present the pinch in food supplies is only slightly felt. Bread, however, has become a scarce article in many stores. This has not been due entirely to the railway tieup, but to government regulations controlling the manufacture of foodstuffs. Stores dependent on bread coming from a distance are feeling the pinch the most keenly.

Buses leaving the city have been crowded but have taken care of the traveling public without serious difficulty. There have been no reports of people stranded here. There has as yet been no shut-down of any industrial plant because of the tieup.

Plan Meeting To
Train Girl Scout
Camp Counsellors

Mrs. Walter Hampton, Girl Scout day camp director, is holding a training meeting for camp counsellors on Tuesday evening, May 28, at 7:30 o'clock in the Home Economics room of the high school.

All who have volunteered for this work are urged to be at this meeting, which will start promptly at 7:30 in order that those who have other engagements for the evening may keep them.

Those who are donating their services for one or two weeks as camp counsellors are: Mrs. Vert Guidebeck, Mrs. Max Osterhout, Mrs. Howard Graff, Mrs. Jack Williams, Mrs. Mauritz Carlson, Miss Winnifred Orr, Mrs. Earl LeBrasseur, Mrs. D. E. Mendenhall, Mrs. Jack Wilde, Mrs. Wm. Mueller, Mrs. Wm. Sheahan, Mrs. W. G. Wilson, Mrs. Myrle Wierenga, Mrs. Scott Creighton and Mrs. Benjamin Gero.

Girl Scout camp standards require at all times the presence of the trained to render first aid. Those donating this service are: Mrs. Geo. A. Shaw, Mrs. Norman L. Lindquist, Mrs. Alex Creighton, Mrs. Ed Jackson and Mrs. J. R. Lowell.

Tips for Farmers

Potato Growing Is A Specialized Business In State
Potato growing in Michigan is getting to be a specialized business. Even though total acreage has decreased in the past ten years, individual growers have increased acreage. Those who did not follow a good spray program, use the best of seed and practices, have found they couldn't compete and dropped out.

Michigan's acreage in recent years is slightly more than half what it was ten years ago, but the average production per acre has increased from 87 bushels in 1935 to 105 bushels in 1945 and the gross income is much higher than ten years ago.

Acreage is increasing in the northern peninsula, but decreasing in the southern part of the state.

Honor Students Active
In High School Affairs

There are twelve honor students in this year's graduation class. These are students who have attained highest scholastic ratings. The following "Who's Who," however, shows evidence that they found much time for extra curricular activity.

Following are the students: Nancy Muriel Cookson is the daughter of Mrs. Muriel Cookson, 520 Oak street; is a member of GAA, band, glee club; has pursued the University course; her hobbies are knitting, reading and sports; she plays the oboe and violin; plans to attend college.

Ann Crowell Peterson (salutatorian) is the daughter of Mr. and Mrs. Herbert K. Peterson, 401 Arbutus avenue; member of band, orchestra, girls' Athletic Association, Senior Service Scouts, debate and speech activities, Students Association board of control; pursued university course; her hobbies are reading, dancing, swimming and music; plays the piano and clarinet; will attend the University of Michigan—received scholarship.

Shirley Jean Heinz is the daughter of Mr. and Mrs. Michael Gordon Heinz, 520 Garden avenue; member of Iron Mountain Glee club; CYO, Dramatic club, Spanish club, Mortarboard, Chorus, Sr. Service Scouts, A Cappella choir, church choir; has pursued university course; her hobbies are ping pong, bowling, swimming, dancing; plays the piano; will attend the University of Michigan—received scholarship.

Sigrid Linnea Nelson is daughter of Mr. and Mrs. Albin Nelson, Manistique, Rt. 1; member of band, glee club, GAA and 4-H club; has pursued university course; her hobbies are sewing and hiking; she plays the clarinet and piano; has received scholarship from Northern Michigan State College.

Betty Jean Carlyon is the daughter of Mr. and Mrs. Stanley B. Carlyon, 550 Cherry street; is member of band, glee club and home economics club; has pursued university-home ec. course;

her hobbies are knitting and dancing; she plays the saxophone; plans to become a home economics teacher.

George Peter Babladelis is the son of Mr. and Mrs. Peter Babladelis, 107 Arbutus avenue; is member of band, GAA, speech, senior girl scouts, First Methodist church; pursued university course; her hobbies are dancing, bowling and reading; plays the clarinet; plans to clerk in her parents' store.

Jeanne Arline Smith is the daughter of Mr. and Mrs. Orville M. Smith, 329 Deer street; member of band, GAA, speech, senior girl scouts, First Methodist church; pursued university course; her hobbies are dancing, bowling and reading; plays the clarinet; plans to clerk in her parents' store.

Frances Carol Lindberg is daughter of Mr. and Mrs. Marcus Lindberg, Manistique, Rt. 1; member of band, GAA and home economics club; followed university course; her hobbies are knitting, swimming and dancing; she plays the clarinet and plans to do secretarial work.

Beverly Ann Windsor is the daughter of Mr. and Mrs. Orville Windsor, McMillan; member of journalism and GAA clubs; pursued a commercial course; her hobbies are reading and sports; she intends to work next year and then take a commercial course.

Ethel Leona Erickson is the daughter of Mr. and Mrs. Henning Erickson, 622 Michigan avenue; member of journalism, Glee club, GAA and Girls' ensemble; pursued a university course; her hobby is reading; plans to work next year.

Eva Dorothy Klarich is the daughter of Mr. and Mrs. Val Klarich, Manistique, Rt. 1; member of GAA and Journalism clubs; pursued a university course; her hobby is photography; and is undecided about what she will do next year.

Myrle Gene Salter is the daughter of Mr. and Mrs. Louis Salter, 211 North First street; is a member of the GAA, Macabees, BARE, junior club, student association and Epworth league; she pursued a commercial course; her hobbies are photography, fashion designing, collecting match folders, flowers and fishing; she plans to go to work immediately.

Seedbed preparation is important. Farmers are urged to use certified seed—especially Menominee, Sebago or Chippewa, which are white-skinned varieties. If the soil will produce them without scab, otherwise Russet Ruralis are recommended.

The use of the field cultivator or disk provides a loose seedbed, and just before planting the field should be plowed 8 to 10 inches deep, with a spring-tooth harrow behind the plow to level the ground. This new practice is working out satisfactorily, because it provides a loose, deep and mellow seedbed.

While the crops specialists urge farmers who are equipped to do so to plant all the acreage they can possibly handle, they remind the growers that quality production and high yields through proper seed, approved practices, and a good spray program pay the profit.

Early planting has started, but the best average planting date is the last week of May and first week in June.

Manistique To Be Well
Represented At
Fight Card

Manistique will be well represented in the fight card at Escanaba Monday evening. Not only will more than half of the bouts at the show have a Manistique boxer in one of the corners, but a host of enthusiastic fight fans from Manistique will be among the spectators.

Clint Leonard, one of the main co-operators at the Manistique end of the show says that one section of fifty-four seats has already been sold out here and that another batch of tickets has been received. Good seats, he says, will likely be available at the box office the night of the show, but it would be much better if the Manistique gang hung together and lent their encouragement from one certain spot. For that reason he suggests that fight tickets be purchased here.

Some of the best bouts that took place in the recent Manistique boxing show, are booked for the Escanaba show. The one which is perhaps the most looked forward to is the match between Don Dougherty, of Manistique, and Jim Piche, of Escanaba. While not the big event of the Manistique show it was the most talked of. Neither lad has a grudge, but oh how they can swat.

Rated as the main event of the evening is the go between Len Sharkey, recently from Manistique but now residing at Escanaba, and Jim Hubbard, of the Soo. Both fighters participated in the recent golden gloves tourney at Escanaba and made brilliant showings in different fights. This fight is a natural.

On the Manistique squad of fighters are Harold "Sarge" Mayer, Cliff Johnson, Cliff Weber, Wayne Anderson, Pinky Weber, Jim Goudreau, Willard Anderson and Don Dougherty.

They have been training under the tutelage of Ed Toyra and John Haind and are reported to be in the pink of condition.

OLD GERMFASK
RESIDENT DIES

Long Illness Is Fatal
To Timber Worker,
Albert Losey, 82

Albert Losey, 82, old resident of Germfask, died Saturday morning at the home of his son, John, in Germfask after an illness of two years. Mr. Losey was born in Butterfield, Mich., June 23, 1854, and came to the Germfask area as a young man. He was employed as a timber worker until forced by his advanced age to retire. His wife died about three years ago. Surviving are three sons, John and Arthur of Germfask; Edmond of Riga, Mich.; two daughters, Mrs. Neva Cook of Wilkes Barre, Pa.; and Mrs. Bertha Dettmeier of Clarkston, Idaho.

Funeral services will be held at 2:30 p. m. Monday at the Methodist church in Germfask, with Brother Norman Weaver officiating. Burial will be in the Germfask cemetery. The body will lie in state at the Ketauer and Jackson funeral home until Monday noon.

COUNTY BUYS
FIRE TRUCK

Will Be Used For Both
City And County
Emergencies

Purchase of a fire truck, acceptance of drawings and plans for the reconstruction of the Schoolcraft county airport and acceptance of the 1945 county audit were the chief items of business transacted at an adjourned meeting of the Schoolcraft County Board of Supervisors at the court house Friday.

Two separate items were considered in the purchase of the fire truck—the fire fighting equipment and the chassis on which it is to be mounted. The bid of the Lundstrom Chevrolet Co. for a chassis was accepted, the price being \$1,506.60. The fire truck and equipment was ordered purchased from the General Fire Truck company of Detroit which will also mount the equipment on the chassis at their Detroit plant. The purchase price was \$3,150.00.

The supervisors spent considerable time discussing the advisability of purchasing equipment with a front end pumper or a truck with pump at the side of the truck, it being explained that a front end pump was handier when water had to be pumped from a ditch or creek while the "midship" type was best for city use. The supervisors chose the midship type.

The new fire truck, which will be installed in the city fire department quarters, will replace equipment on a Reo chassis, purchased by the city in 1927. The new truck will be used in answering both city and rural calls.

Most of the afternoon was taken up in conference with the Francis Engineering company, of Saginaw, going over plans for the rearrangement of the airport, the location of hangars and construction of runways. It was a detailed report which, when followed, will provide an airport that will conform to requirements of the state aeronautics board before financial aid in its construction will be given.

Construction work on the airport will begin as soon as funds from the state are available. The county will have to match the state aid given.

Observe the Spirit
Of Memorial Day

The Memorial Day idea got its start when some women in a Southern state, while decorating graves of Confederate dead, also placed flowers on the graves of Union soldiers. It symbolized forgiveness and a willingness to forget the hatreds that prevailed while the war was on. It would be a fine thing if that spirit prevailed more generally in America.

John I. Bellare is in White Pigeon attending a family reunion.

Mr. and Mrs. Adam Heinz and daughter, Suzanne, and Mrs. James Chandrais have returned to their homes here after spending a few days in Holland, Mich., where they attended the tulip festival.

George Rouleau, Francis Danko and Donald Weber have returned from Flint where they visited the latter's aunt, Mrs. Ethel McMichael.

Mr. and Mrs. George Nicholson and Mrs. Grace LeRoy have returned to their homes here after spending the winter in Donna, Texas.

Dr. Andrew Sromovsky has left for North Milwaukee where he will open a dental practice following a visit with his parents, Mr. and Mrs. George Sromovsky, Lake street. Dr. Sromovsky was released from the navy a month ago.

Melford C. Christensen has arrived here for a visit at the home of his father, Carl Christensen, Lake street, following his recent discharge from the navy at the Great Lakes, Ill., personnel separation center.

Mr. and Mrs. O. W. Oberg have arrived here from Austin, Minn., for an indefinite stay with Mrs. Oberg's mother, Mrs. J. A. Baker, at their cottage on Indian Lake.

Kenneth Belanger of Mt. Pleasant is visiting with his parents, Mr. and Mrs. William Belanger of Gulliver.

Shirley Bursaw has arrived at his home in Thompson, following his discharge from the navy at Great Lakes, Ill. He spent three years in the European theater.

Weber & Vaughan
Are Discontinuing
Grocery Business

Thomas Vaughan and Anton Weber, of the firm of Weber & Vaughan, announce that they are discontinuing their grocery business, which they have conducted for the past twenty-seven years at 209 South Cedar and on June 1 will close up shop.

Asked concerning future plans, Vaughan stated that for the immediate future he intends to take a good rest. He has been on the job, practically without a vacation through the years they have been in business. Patronage, he said, has been good, but the present ordeal of trying to get something to supply the trade has been discouraging.

No announcement has as yet been made as to what firm will occupy the site.

Grade School
Pupils Present
Pleasing Shows

Manistique grade school pupils made their bow as entertainers at the high school auditorium on the evenings of last Friday and the Friday previous. Last Friday the youngsters from Lincoln school presented the program and on May 17 those from Lakeside and Central schools did their stuff. On both occasions they put on a show that made their parents and the others present very proud and happy.

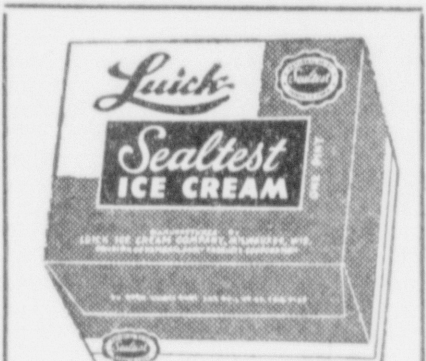

On each occasion the entertainment followed the same pattern. First and second graders sang songs and enacted what customarily goes on in the home from morning until bed time. Each act, such as dusting, sweeping, cooking, washing, mending, etc., was enacted by one of the number while the rest of the gang sang lustily.

The second division of the program, presented by the third and fourth grade pupils was in the nature of a minstrel show, with blackfaced comedians cracking jokes between choruses. Familiar old time music was sung by the chorus.

The third division of the program was presented by pupils of the fifth and sixth grades. The boys and girls were dressed in Mexican costume and sang Mexican songs. The soprano-alto harmony in many of the numbers was very effective. The Spanish dances also made a distinct hit.

The children were under the direction of Miss Margaret Johnson.

Scheduled transcontinental air runs are made in approximately half the time required 10 years ago.

DODGERS SPILL PHILS, 7 AND 1

First Place Lead Over Idle Cards Boosted To 1 1/2 Games

Philadelphia, May 25 (AP)—The Brooklyn Dodgers increased their first place lead over the idle St. Louis Cardinals to one and a half games today by spilling the Philadelphia Phils 7-1.

The triumph, the Dodgers' fifth straight, also was their 14th in a row over the Phils at Shibe Park—all 11 last year and the first three this season.

Vic Lombardi, who went the route for the Dodgers, held the Phils to five hits, three of them coming in the ninth inning when the losers scored their lone run. It was the little lefthander's fifth victory against two defeats.

Brooklyn ... 032 010 100—7 10 0 Philadelphia ... 000 000 001—1 5 3 Lombardi and Anderson; T. Hughes, Mulcahy (3), Hoerst (9) and Seminick.

GIANTS 5, BRAVES 3

New York, May 25 (AP)—Although Monte Kennedy needed the help of Ken Trinkle, the young southpaw rookie gained his third triumph of the season today, as the New York Giants defeated the Boston Braves 5-3.

Kennedy allowed only one hit in the five innings he pitched, but his wildness caused his exit in the sixth. With the Giants ahead 5-1 in the sixth, he hit Johnny Hopp with a pitched ball and walked both Tommy Holmes and Ray Sanders to load the bases and walk himself to the showers. Trinkle took over and escaped with only two runs scored against him. He gave up one more hit in the last three frames.

Game Under Lights Winds Up Rally Of VFW In Escanaba

Ironwood Nips Escanaba In Class B; Munising Is Class C Track Winner

Houghton, May 25—Ironwood nosed out Escanaba, 41 to 40 1/2, to win the Class B Upper Peninsula track and field championships here this afternoon. Munising snagged the Class C title and Chassell took Class D-E title in a close race with Powers.

The point score in Class B follows: Ironwood 41, Escanaba 40 1/2, Menominee 30, Sault Ste. Marie 26 1/2, Manistique 15, Negaunee 13, Iron Mountain 7, Calumet 4 1/2, Graveland 2 1/2, Kingsford 2, Bessemer 1, and Iron River 0.

The first five places in Class C—Munising 43 1/2, Newberry 33 1/2, L'Anse 16 1/2, Baraga 16, Wakefield 1 1/2. The first four places in Class D-E follow: Chassell 46, Powers 44 1/2, Eben 44, J. D. Pierce 21.

New records established during the afternoon include the following: Class B shotput, Mitchell, Negaunee, 50 ft., 31-8 inches; Class C shotput, Emblad, L'Anse, 44 ft., 7 inches; Class C high jump, Glasson, Baraga, 5 ft., 11 inches.

ESKYMOS PLAY IRON MOUNTAIN

Prep Baseball Game Is Planned Here Monday Afternoon

The Escanaba high school baseball team will meet Iron Mountain at the municipal diamond Monday afternoon at 4:15 o'clock. The game was scheduled for last Monday but was postponed because of rain.

The Eskymos defeated the Mountaineers at Iron Mountain several weeks ago. Jim Ross, who scored a decision over the Iron Mountain preppers, will probably draw the pitching assignment for Escanaba Monday.

This game will probably be the only home game of the season for the Eskymos. Tentative plans for scheduling additional games with Kingsford are not likely to materialize because of conflict with the year end schedule at the high school.

Tomasoni of Iron Mountain will umpire the game.

Gladstone Redskins Meet Chatham Nine In Season Opener

Gladstone, Mich. — The Gladstone Redskins, local entry in the Rainbow league, will open the season today when they clash with the Chatham All-Stars at 2:30 o'clock at Chatham.

"Dib" Bovin was selected as manager of the local nine at a meeting held Friday evening at the city hall. Bill Heslip was named commissioner. August Mattson Post, American Legion, is the team sponsor.

Members of the team will meet at the city hall between 11:30 and 12 o'clock this morning from where the start to Chatham will be made.

New uniforms which have been under order for sometime and which were assured for today have not arrived but hopes are held they will be here within a week.

Among players expected to make the trip are Mel Rothchild, Knute Wright, Alden Haglund, Pete DeMenter, Ed Olson, John Lundmark, Gordon Boutlier, Kinkella, Brock, Sabourin, LaPoint, Brown, Mathison, Stewart, Boden, Gamache, LeGault, Wiltz, Carlson and Young.

BEARS PLAY AT NIAGARA TODAY

Local Club Will Meet League Leaders; Fitzpatrick To Hurl

The Escanaba Bears baseball team will play at Niagara this afternoon in their second away from home game of the season. The ball players will travel to Niagara by bus, leaving from DeGrand's corner at Ludington street at 12:30 o'clock. Niagara is operating on slow time.

The Badgers of Niagara are leading the Northern Wisconsin Michigan league with three successive victories, the only undefeated club in the circuit, while the Bears are in the cellar with two successive narrow defeats.

Despite all this, the Bears expect to give the Badgers an exciting afternoon. Jim Fitzpatrick, Escanaba left hander, is slated to make his first start of the season, having recovered from an illness which kept him out of action last week. Jack Beck, who hurled effectively despite two losses in earlier games this season, will be on hand for service if needed. Toddlers Flath will be behind the plate.

Another orgy of cold and rainy weather has hampered the Bears' training program during the past week and Manager Schwalbach is hopeful for some warm weather.

GAMES TODAY

Iron River at Iron Kings.
Escanaba at Niagara.
Iron Mountain at Channing.
Negaunee at Crystal Falls.

line separating the first and second division teams probably will be drawn in the standings of the N. W. M. Baseball league after Sunday's games marking the end of the fourth weekend of play.

Local spotlight will be divided between Kingsford and Niagara. The rejuvenated Iron Mountain-Kingsford Iron Kings make their second successive home stand, facing Iron River. Niagara returns home for a meeting with Escanaba.

One of the most appealing games of the day will take place at Channing where the Railroaders will be host to the Iron Mountain Rangers. Crystal Falls returns home for a clash with Negaunee.

Judging from past performances, the Iron Kings are slight favorites to take Iron River, Iron Mountain is rated stronger than Channing, Niagara has the pre-game nod over Escanaba, and Negaunee should turn back Crystal Falls without too much trouble.

That version of Sunday's results would form a first division with Niagara in first place, Iron Mountain in second and the Iron Kings and Negaunee tied up for third place. However, a few upsets would cause such confusion that the difference between first and second divisions would not be distinguishable.

PROVO-MASSEY IN SEMI-FINAL

Sparkling Boxing Card Offered; Opening Bout At 8:30

A sparkling card of AAU boxing matches topped by the amateur fight of the year in which Leonard Sharkey, of Escanaba, will meet Jim Hubbard, of Sault Ste. Marie, will be presented at the Escanaba junior high school gymnasium Monday night at 8:30 o'clock.

CALL FOR LIONS
Escanaba Lions club members are asked to report at the junior high gymnasium this morning to assist in erecting the ring. The crew will begin the task about nine a. m.

The tentative pairings include 13 bouts but some revision will probably be required after the boys weigh in Monday afternoon and evening. The matches include boys from the Escanaba training center, eight from Manistique, and others from Norway, Sault Ste. Marie and Iron Mountain. Two of the boys included in the Escanaba group are Bob Hart, of Gladstone, and Henri Beauchamp, of Hardwood, who have been working out at the Escanaba gymnasium.

The tentative pairings follow: Bob Hart, Gladstone, vs. Lardeno, Norway.

Wayne Anderson, Manistique, vs. Ronald L. Court, Iron Mt.

Leo LaCrosse, Escanaba, vs. Cliff Weber, Manistique.

John Stropich, Escanaba, vs. James Goudreau, Manistique.

Ray Sabuco, Escanaba, vs. DeBakker, Norway.

Joe Lequia, Escanaba, vs. R. Devine, Norway.

H. Beauchamp, Hardwood, vs. Pinky Weber, Manistique.

Ray Goodnough, Escanaba, vs. Harold Mayer, Manistique.

Chuck Larson, Escanaba, vs. Willard Anderson, Manistique.

Jim Piche, Escanaba, vs. Don Dougherty, Manistique.

Bob Provo, Escanaba, vs. Al Massey, Sault Ste. Marie.

Leonard Sharkey, Escanaba, vs. James Hubbard, Sault Ste. Marie. The referee for the fights Monday night is Jimmie Mandl, of Iron Mountain, who officiated in the Golden Gloves tournament here last February. The judges are also from Iron Mountain and include Buck Erickson, sports editor of the Iron Mountain News.

The advance sale of ringside seats indicates a large crowd of enthusiastic fight fans will be on hand for the action. Reserved seats are still available at Gust Asp's in Escanaba and Hackenbrach's, Manistique. General admission seats and student tickets will be available at the gymnasium Monday night.

The fight card shapes up as the best boxing show here presented in several years. The finalists, Sharkey and Hubbard, are both Upper Peninsula Golden Gloves open champions, titles which each won by virtue of knockout victories.

The semi-final match also stacks up as a thriller with Bob Provo, whirlwind Escanaba featherweight, slugging it out with Al Massey, of the Soo.

Escanaba fighters will weigh in at five o'clock Monday afternoon at the gymnasium and boxers from other communities will weigh in at seven o'clock.

The fight program is sponsored by the Escanaba Lions club and proceeds will be used to provide additional equipment for the local boxing training center.

Announce Winners In Elks Bowling Tournament Here

The L & L won the team event with a score of 3073 and Clyde McGonagle was top man in the singles with a 700 score in the Elks club bowling tournament which ended last week.

King and Lewis took first money in the men's doubles with 1244.

The women's singles was won by Mrs. H. Nolden with a 556. The High Balls won the five man team event and the Schmidt-Reynolds the doubles with a score of 1086.

Other results: Men's team event—L&L, 3973; King's Lawyers, 2917; BPO Elks, 2915; 800's, 2910. Has Beens, 2863; Singles: Clyde McGonagle, 700; Jim Ferguson, 647; Delrin Remington, 646; Harry Hogan, 640; Floyd Anutta, 632. Doubles: King-Lewis, 1244; Saykily - O'Leary, 1229; O'Brien-Heino, 1224; Stephenson-Bathke, 1220; McGonagle-Erickson, 1217. High individual game, C. McGonagle, 260; high team game, L&L, 1046; all events, F. Lewis, 1896.

Women's events: Singles: H. Nolden, 556; B. Treiber, 551; B. Bodette, 554; F. Muldock, 543; C. Harvey, 540. Team event: High Balls, 2521; Belles, 2510; Needhams, 2479; Black Jacks, 2477; Bird's Eye, 2461. Doubles: Schmidt-Reynolds, 1086; Breitenbach-Johnson, 1071; Ehnerd-Lewis, 1048; Maas - Muldock, 1028; Nerbonne-Meyers, 1026.

All events: M. Breitenbach, 1557; high single game, Annette

The Sports Parade

By Ken Gunderman

Al Ness and Ed Edick are tossing orchids to Victor Tuominen, manager of the Marquette baseball team, for the fine spirit of sportsmanship displayed by Tuominen in agreeing to postpone the opening game in the Rainbow league scheduled here for today. The postponement became necessary when the Eskymos' game with Iron Mountain last Monday was rained out and rescheduled for Monday, May 27. High school players cannot compete in independent baseball until their high school season is completed and the Cubs, managed by Al Ness, include a heavy percentage of high school athletes. The game will probably be played as a part of a doubleheader here Aug. 4.

Negotiations also are under way with Manistique for postponement of the game scheduled there Sunday, June 2, for a similar reason. There still is a possibility that the Eskymos may play one or two more high school baseball games and, anyway, the EHS seniors will be occupied Sunday, June 2, with a graduation program at the

school. If Manistique acquiesces to the postponement, that game will be played either as a part of a doubleheader at Manistique, Aug. 11, or perhaps as a twilight game earlier in the season. Ness has had his troubles getting his ball club under way for the season, but he is confident that the lads will prove to be highly popular throughout the Rainbow league territory.

Escanaba baseball fans who may be planning to drive to Niagara today to see the NWM league leading Badgers meet the Escanaba Bears are reminded that Niagara is on slow time.

Wouldn't it cause some eyebrow-lifting if the Bears, in the cellar, knocked off the lofty Badgers? Niagara is no Superman ball club, as their close squeaks with Negaunee and Channing proved. The Bears haven't hit their stride yet, are booting the ball at inopportune times, but all this should be remedied before long. Fans will probably get a look at Jim Fitzpatrick on the hill today. He has recovered from illness which kept him at home last Sunday when Escanaba played at Iron River.

If you haven't bought tickets yet for the amateur fight show Monday night, here's a good tip. Drop in at Gust Asp's and pick out some choice ringside seats. The fight card will be a genuine treat for boxing fans, topped by the highly anticipated match between Leonard Sharkey and Jim Hubbard. The Escanaba fight training center was a beehive of activity Friday night as the boys wound up their training for the Monday night show.

Hit and Miss—Iron Mountain expects its 1946 high school football team to be the terror of the Menominee range. Don Ladwig, 1944 all-U. P. center, will be back for another season of eligibility. He will be 20 on Nov. 2, the day after Iron Mountain concludes its season. Adolph Lundberg, of Iron Mountain, landed a 3 1/2 pound brook trout from the Michigan river the other day. Yeah, that's right, 3 1/2 pounds. Wonder if Michigan Tech will redeem its promise to send a full boxing team to Escanaba for the 1947 Golden Gloves tournament now that Don Sherman has died suddenly.

BASEBALL

PRACTICE GAME

The Flat Rock CYO will play the Challengers in a practice softball game scheduled for two o'clock this afternoon at the No. 1 diamond.

Meyers, 223; high three game series, Lou Schmidt, 563. Mixed doubles: Cora and Don Pearce, 1224; Mary Alice Tobin, Ed Kraemer, 1189; A. V. Meyers, 1184; Helen, Carl Bennett, 1164; Lou, Frank Bink, 1137.

High team game: Coral and Don Pearce, 434. High single game, L. Freeman, 248, Carl Bennett, 279.

RAIN HAVOCS SOFTBALL PLAY

Paper Mill Still Tops In American Loop Standings

Rain played havoc with last week's softball schedule and only six games were played. Granada Gardens nosed out Larmays and Bethany defeated the Challengers in Tuesday night's program.

Wednesday evening saw an enthusiastic St. Joe team come from behind to edge out Dagenais Grocery in an eight inning struggle at the lighted field. In the second game the hard-hitting Buck Inn handed the Birds Eye its fourth straight setback.

The youthful Hawks nearly upset Liengh's Music Store but lost, 6 to 4, in an interesting game at the Webster diamond. The strong V. F. W. team had to extend itself in winning from People's Bar, 5 to 3.

If this week's schedule is not interrupted, all games will be made up with the exception of the tie between the Birds Eye and People's Bar which will be played off in a future contest under the lights next week. The teams which were fortunate enough to play last week will play only once this week.

Monday night's games are all scheduled for 7 o'clock because of the boxing show and no games will be played on Memorial Day in accordance with association rules.

SCHEDULE FOR WEEK

Monday—St. Ann vs. V. F. W. at lighted field, 7:30. Lloyd Jensen; Bethany vs. St. Joe at Webster, Jens Jensen; People's Bar vs. Paper Mill at No. 4, Joe Gardner.

Tuesday—Buck Inn vs. Paper Mill at lighted field, 7:30. Jens Jensen; Hawks vs. St. Joe at lighted field, 8:30. Lloyd Jensen; Challengers vs. Liengh's Music Store at No. 4, Wilfred Brown; Liberty Loans vs. Larmays at Webster, Joe Gardner.

Wednesday—Flat Rock C. Y. O. vs. Larmays at lighted field, 7:30. Walter Brown; St. Ann vs. Liberty Loans at lighted field, 8:30. Lloyd Jensen; K. of C. vs. Liengh's Music Store at Webster, Joe Gardner; Hawks vs. Bethany at No. 4, Wilfred Brown; Birds Eye vs. White Birch at Flat Rock, Jens Jensen.

Sunday—K. of C. vs. Dagenais Grocery at lighted field, 7:30. Walter Brown; Bethany vs. Liengh's Music Store at lighted field, 8:30. Walter Brown.

STANDINGS

American League

Paper Mill 4 0 1.000
Buck Inn 4 1 .800
V. F. W. 4 1 .800
White Birch 3 1 .750

Hawks 2 2 .500
St. Joe 2 2 .500
K. of C. 1 3 .250
Dagenais Grocery 1 4 .200
Challengers 0 1 .000

More Girls' Teams Needed For Senior League's Play Here

Only one team is entered in the senior division of the girls' softball league here and girls, 16 years of age and over who are interested in organizing teams, are asked to contact Naomi Vinette at the city recreation center.

For the time being the single senior girls' team will compete with the three teams entered in the league's junior division.

Following is the schedule for the first week of league play: Monday, Ludington park diamond, 7 p. m. Pete's Furniture vs. High Hatters; Wednesday, Ludington park, 7 p. m. Sluggers vs. Sally Stack's team.

Only two games each week will be scheduled until more teams are entered in the league. Players are asked to report promptly at 7 o'clock so that games may begin on time.

to victory. A double by Vernon and a single by Travis with the bases loaded accounted for three runs in the fifth.

(First Game)
Philadelphia . 000 000 100—1 3 1
Washington . 000 130 00x—4 10 1
Newsom and Rosar; Haefner and Evans.

(Second Game)
Philadelphia . 010 010 000—2 8 4
Washington . 000 000 03x—3 7 0
Fowler, Christopher (8) and Rosen; Wolff, Scarborough (7), Curtis (9), Kennedy (9) and Guerra, Evans (9).

BROWNS BLANKED
St. Louis, May 25 (AP)—Big Jim Seery's home run up the left field bleachers in the sixth inning gave the Cleveland Indians a 1-0 shutout over the St. Louis Browns tonight behind the effective hurling of Allie Reynolds.

Cleveland ... 000 001 000—1 10 0
St. Louis ... 000 000 000—0 4 0
Reynolds and Hayes; Zolask, Muncieff (9) and Helf, Mancuso (9).

Six pitchers, four for Washington and two for Philadelphia, saw service in the second game, with Ray Scarborough the winner, and Dick Fowler the loser.

This was quite a contrast to the opener, a rather dull but satisfactory
